   - 7.2 Glossary

1. Overview

The Galaxy Performance Tracker is the central dashboard for monitoring sales quota performance across all divisions, business units, brands, and individual contributors. It pulls live data directly from the Vtiger CRM and replaces manual Excel-based quota tracking.

1.1 What is the Galaxy Performance Tracker?

In one place you can see:

- How much each rep has booked against their quota for any period (Q1, Q2, H1, H2, Annual).
- How each division and business unit is tracking relative to target.
- Which customer accounts and OEM brands are driving the most revenue.
- How individual performance ranks across the entire team.

1.2 Roles and Permissions

Access to data on the dashboard depends on the role assigned to your account.

Role	What they can see
CEO	Full organisation view — all pages and all data. No Admin tools.
Admin	Everything — all reps, all divisions. Plus: Sync from Vtiger, edit quotas, manage the IC roster, aliases, and user accounts.
Leader / TL	Own team and rollup RTM only. Sees the Leaders page with their own team card. Banner: "Showing your login data only".
User (IC / rep)	Own numbers only. Overview, RTM, and BU cards show only their own slice of data.

1.3 Logging In

Open the application using the URL shared by your Admin. Chrome, Safari, or Edge are recommended.

Steps to Log In:

1. Open the application URL in your browser.
2. Enter your registered Email Address and Password.
3. Click **Sign In.**
4. Use the show/hide password toggle (eye icon) on the password field if needed.
5. If you forget your password, use the Forgot Password link on the login screen.

> Do not share your login credentials. Each user must have their own account. Contact Admin to set up new users via Admin → User Management.

1.4 The Financial Year and Quarter System

The financial year runs from **April to March**, divided into two halves (H1 and H2) and four quarters (Q1–Q4).

Period	Months covered
Q1	April – June
Q2	July – September
H1	April – September (Q1 + Q2)
Q3	October – December (labelled Estimated until synced)
Q4	January – March (labelled Estimated until synced)
H2	October – March (Q3 + Q4)
Annual	Full financial year (H1 + H2)

2. Understanding the Numbers

2.1 The Three Revenue Totals

> ⚠ This is the single most important concept before reading any number on the dashboard. There are three distinct revenue totals — all correct, all measuring different things.

Revenue Total	What it includes
IC Actuals (RTM ICs)	Closed Won deal amounts for RTM Individual Contributors and Team Leads only (S1, S2, CB, GB, South, GeoX). BU Heads and AVPs are excluded from this total.
IC Actuals Including Others	All Closed Won amounts — RTM ICs/TLs plus BU Heads, AVPs, and Self sellers (e.g. Yusufali Petiwala).
BU Donut / Category Total	Amount by category from RTM-team IC and TL deals only. Equals IC Actuals in total. Does not include BU Heads' own deals.

> ℹ A full Vtiger "Closed Won" export total will be higher than IC Actuals — that is by design. The three tiles answer different business questions.

2.2 Attainment %

> **Attainment % = Actuals ÷ Quota × 100**

Example: If your H1 quota is ₹50 Cr and you have closed ₹22 Cr, your attainment is 44%.

- **Actuals** = sum of Amount on all Closed Won opportunities in Vtiger for the period.
- **Quota** = the figure set by Finance / Admin in the IC Quota Roster for that period.
- **H1, H2, and Annual quotas are independent.** Finance sets them separately — H1 is not forced to equal Q1+Q2. Do not expect these to auto-sum.
- If quota is blank, attainment shows "–" rather than 0%.

2.3 Status Colours

Colour / Status	Attainment threshold
On Track	≥ 50% — Performing at or above the mid-point
At Risk	30%–49% — Behind pace, needs attention

Critical	Below 30% — Significantly behind, management review needed

2.4 Revenue Multipliers

Multipliers apply to quota credit only — they do not change the actual revenue figure displayed on the dashboard.

Deal type	Multiplier
PS — Primary focus areas (Managed Services, SOC, Cloud, Automation, Deployment)	2.0×
CSN — Cyber Security & Networking (all sub-categories)	1.3×
DCG — Backup & Storage sub-categories	1.2×
All other deals	1.0× (no multiplier)
PS — Secondary areas (Residency, 3rd party AMC, Day-2, T&M)	Excluded — does not count towards quota

2.5 The Period Toggle

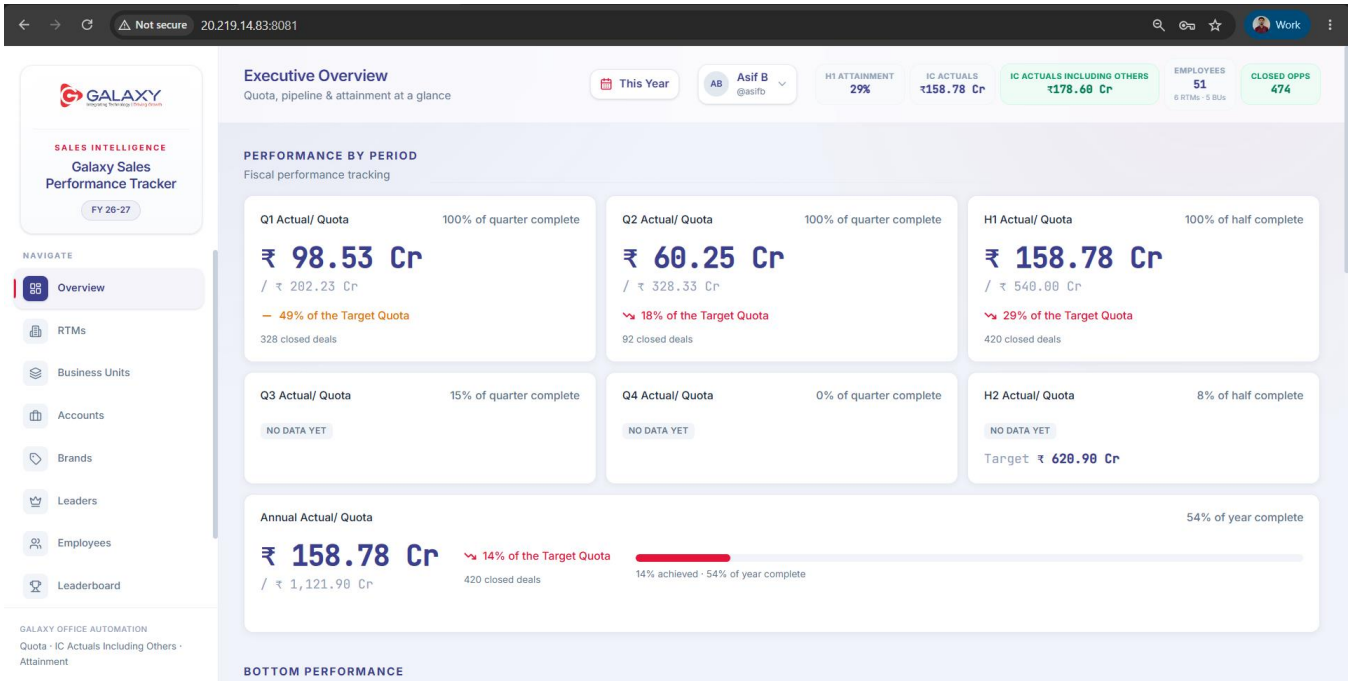

Every page has a period toggle at the top. Switching it recalculates all numbers on that page — quotas, actuals, attainment %, deal counts, and rankings.

- **Q1, Q2, Q3, Q4** — single quarter view.
- **H1, H2** — six-month half-year view.
- **Annual** — full financial year.
- **"Estimated"** — appears on Q3 and Q4 until Admin runs a sync. Do not use Estimated figures for formal reviews.

Date range filter — the header date selector (default: This Year) recomputes actuals for the chosen range. Quotas do not change with the date filter — they remain as Finance set them.

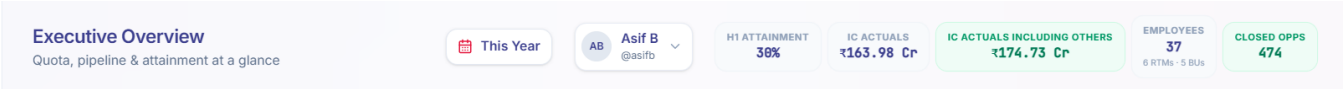

3. Dashboard Pages

3.1 Overview Page

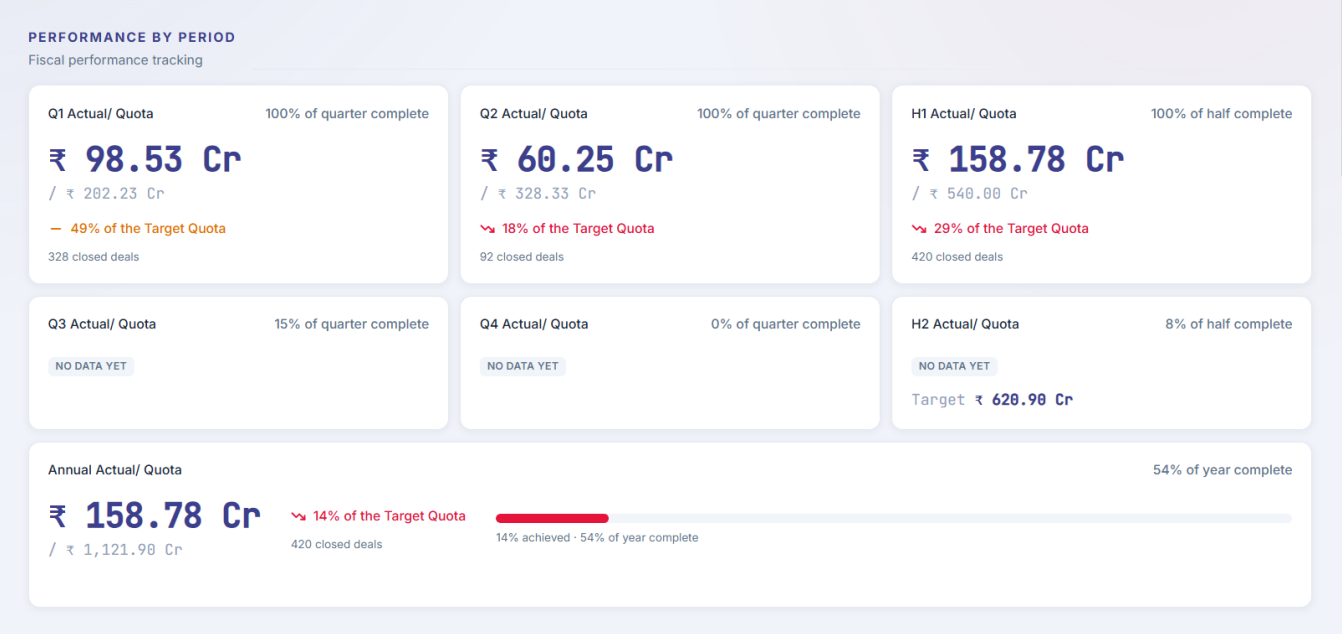

The Overview page is your starting point. It shows the health of the entire business in one view.

Header KPI Tiles

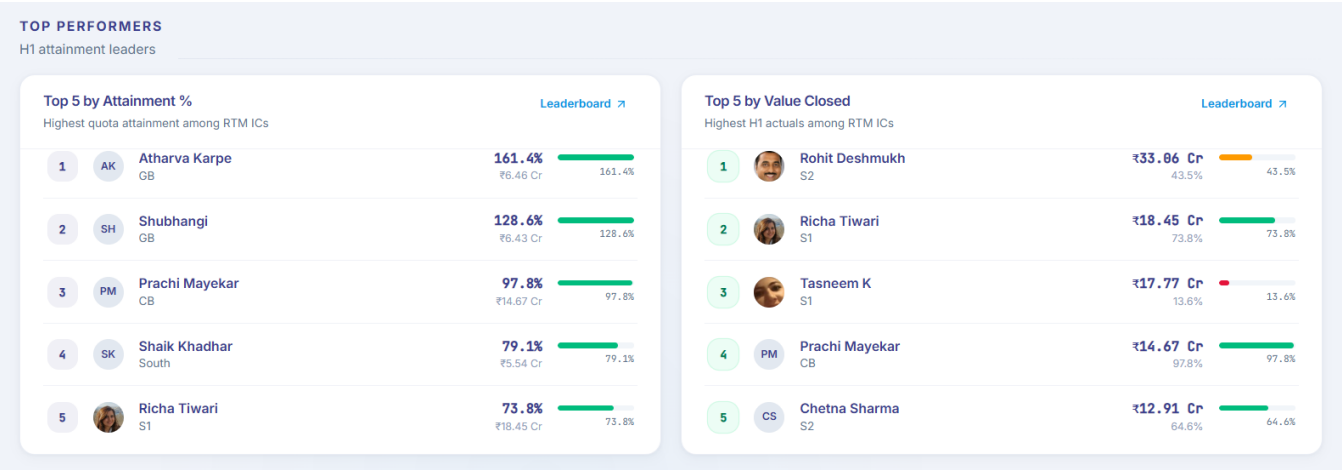

Tile	What it shows
IC Actuals	Total revenue closed by RTM Individual Contributors for the selected period.
Including Others	IC Actuals plus BU Heads, AVPs, and any other staff with pipeline deals.
Closed Opportunities	Count of Closed Won deals for the selected period.
Attainment %	IC Actuals ÷ IC Quota × 100 for the selected period.

Period Metrics Cards

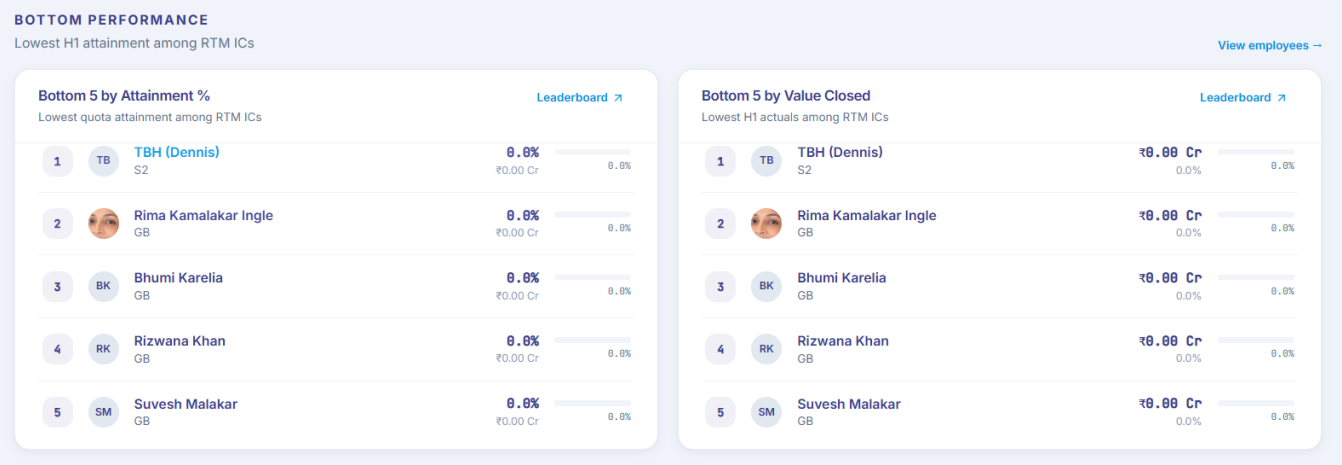

Seven period cards (Q1, Q2, Q3, Q4, H1, H2, Annual) display deal count and revenue for each period. The cards update dynamically when you change the period toggle, highlighting the currently selected period.

Top Attainers Widget

Lists the top Individual Contributors ranked by attainment % for the selected period.

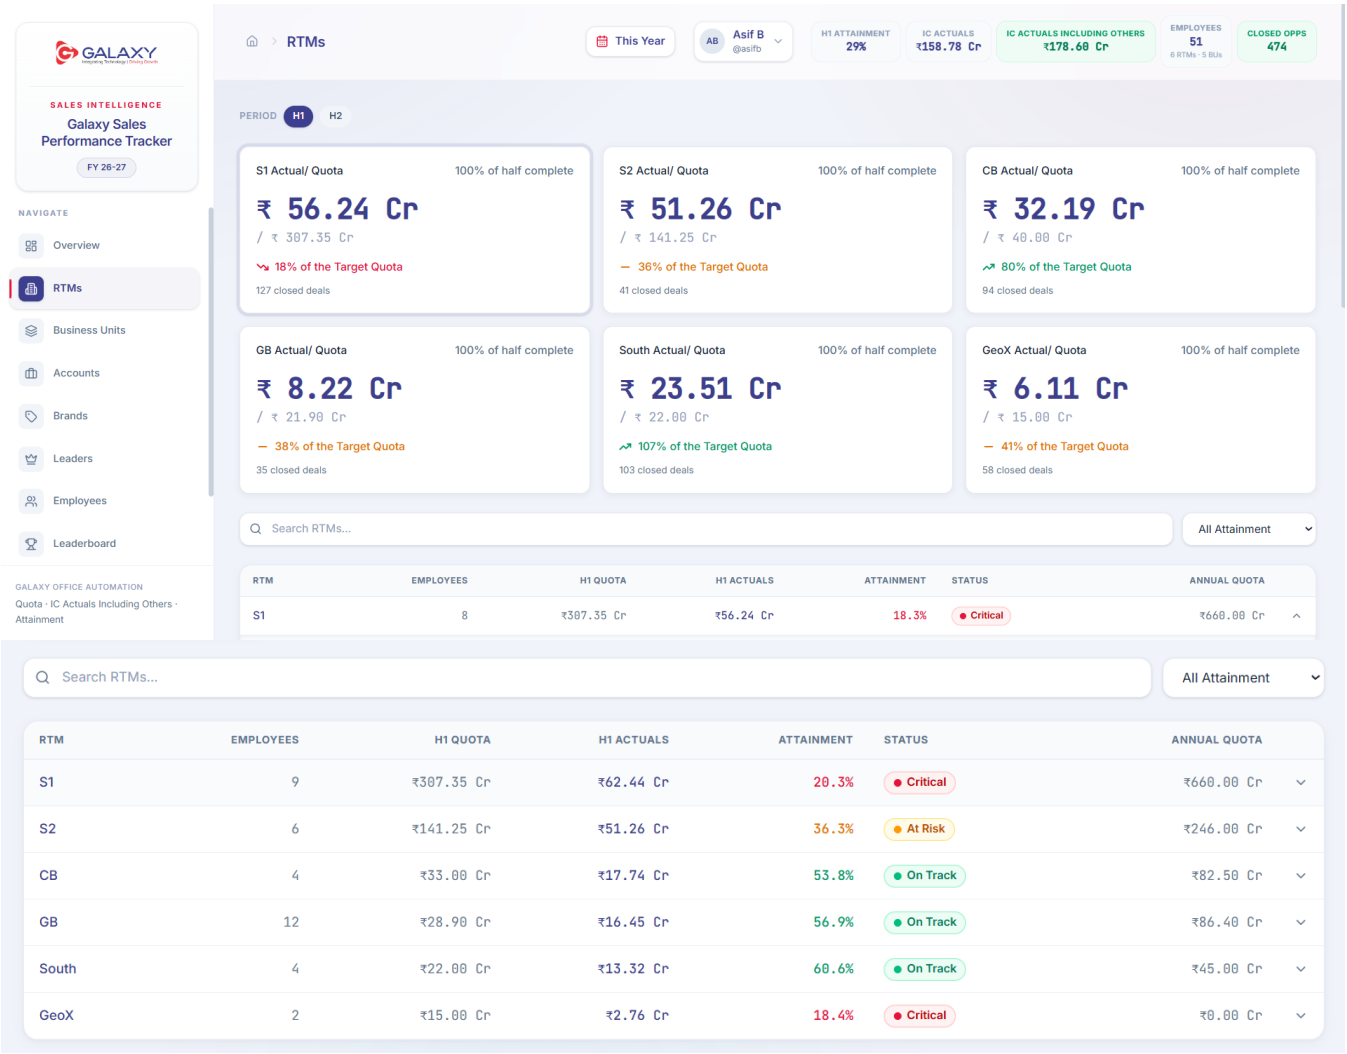

At-Risk and Critical ICs Widget

Lists ICs whose attainment % falls below the On Track threshold, split into two groups:

- **At Risk** — attainment 30–49%. Pipeline conversation needed.
- **Critical** — attainment below 30%. Immediate management review required.

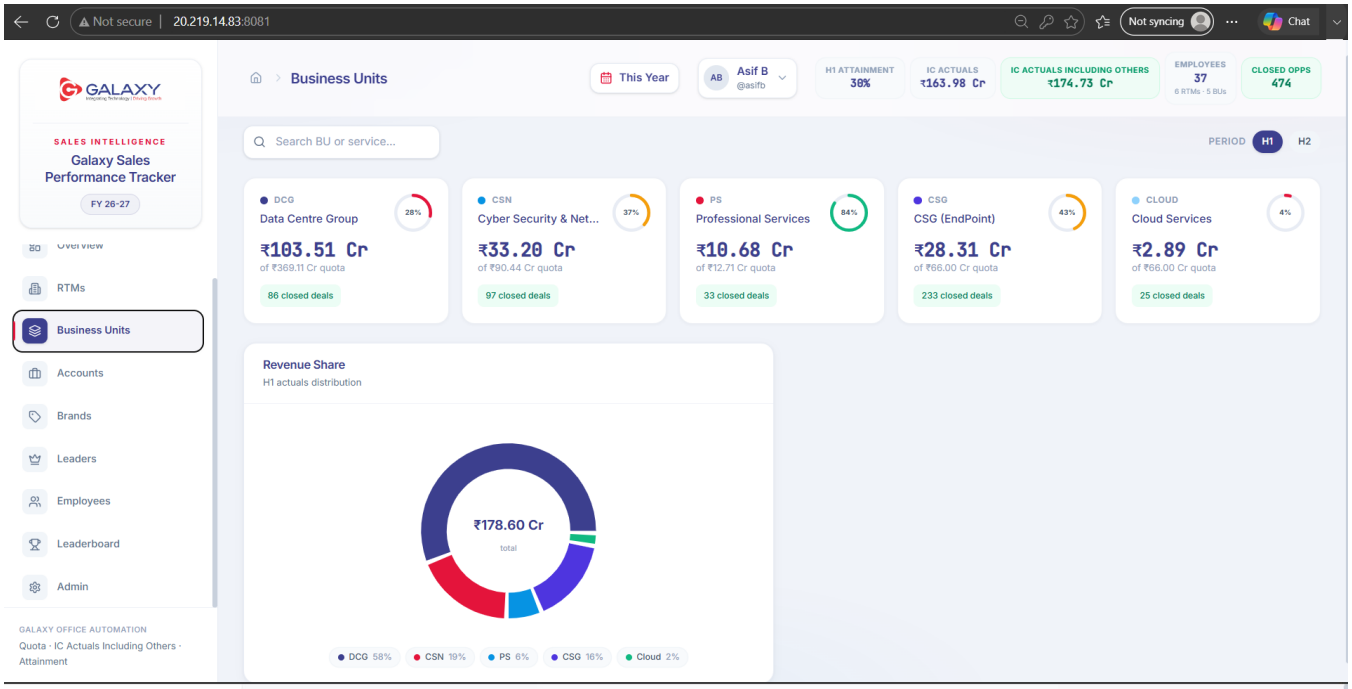

3.2 RTM — Route to Market Page

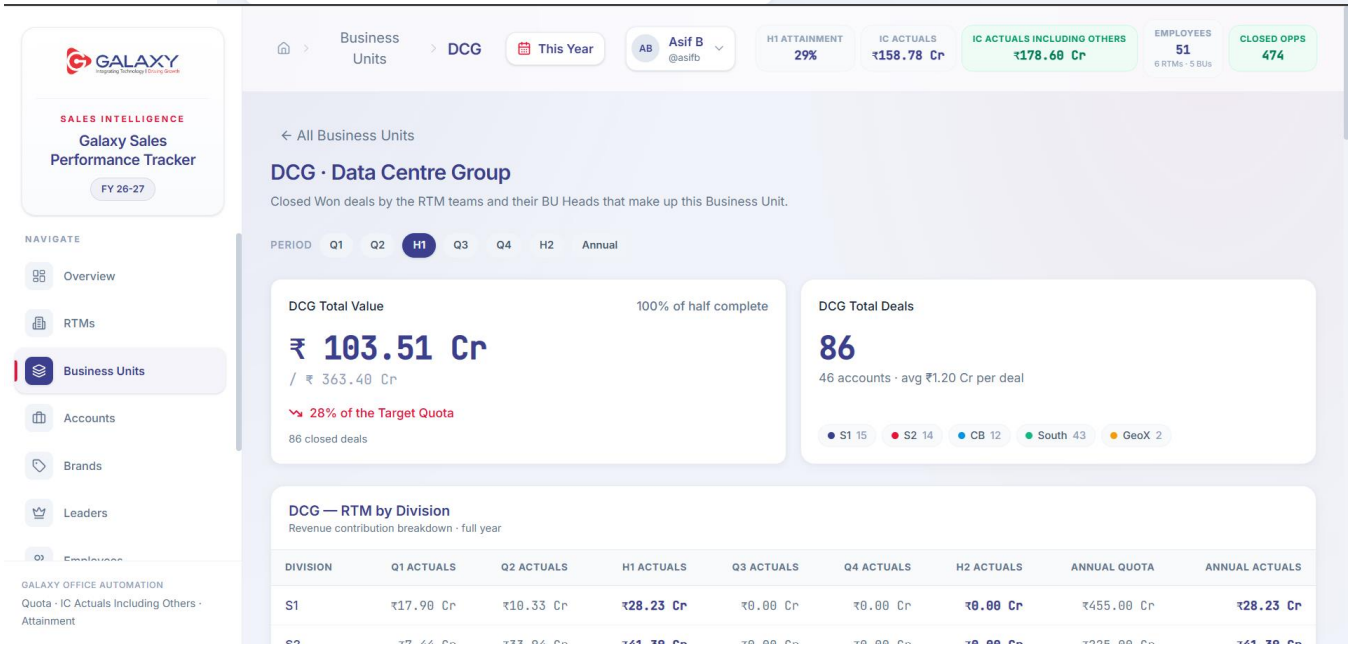

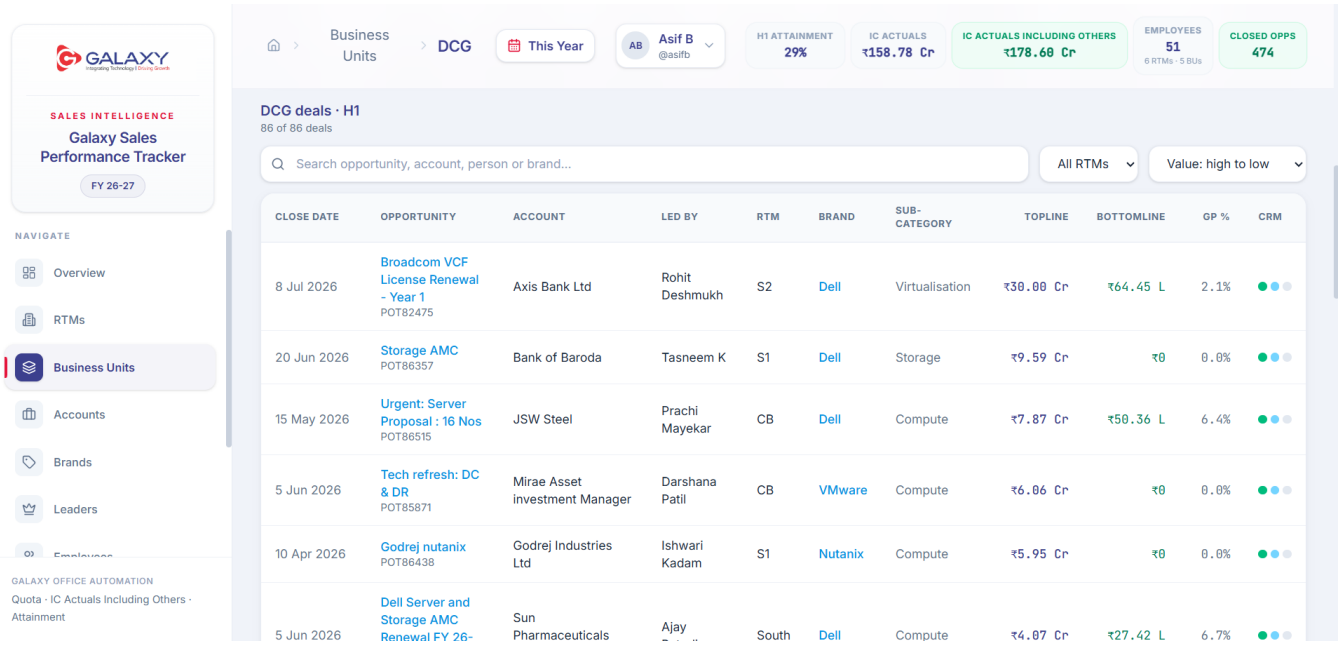

Shows performance by sales division: S1 (Strategic 1), S2 (Strategic 2), CB (Commercial Business), GB (Growth Business), South, and GeoX (Geo Expansion).

- Each division card shows quota, actuals, attainment %, and deal count for all available periods (Q1–Q4, H1, H2).
- The status colour (Green / Amber / Red) reflects the division's attainment for the selected period.
- Click a division card to see the IC-level breakdown within that division.
- **BU Heads and AVPs are excluded from RTM totals** — their deals do not roll into division actuals or quotas, so each RTM card total matches the sum of its IC and TL rows.

Cuts the data by what was sold (product category) rather than who sold it. The five BUs are DCG, CSN, PS, CSG, and Cloud.

- The donut chart shows revenue split across BUs. Hover over a segment to see value and percentage.
- A deal falls into a BU based on its Category field in Vtiger. Blank Category = "Unclassified".

> ℹ BU attainment may differ from RTM attainment: RTM counts IC deals only; BU counts every deal in that category, including those led by BU Heads.

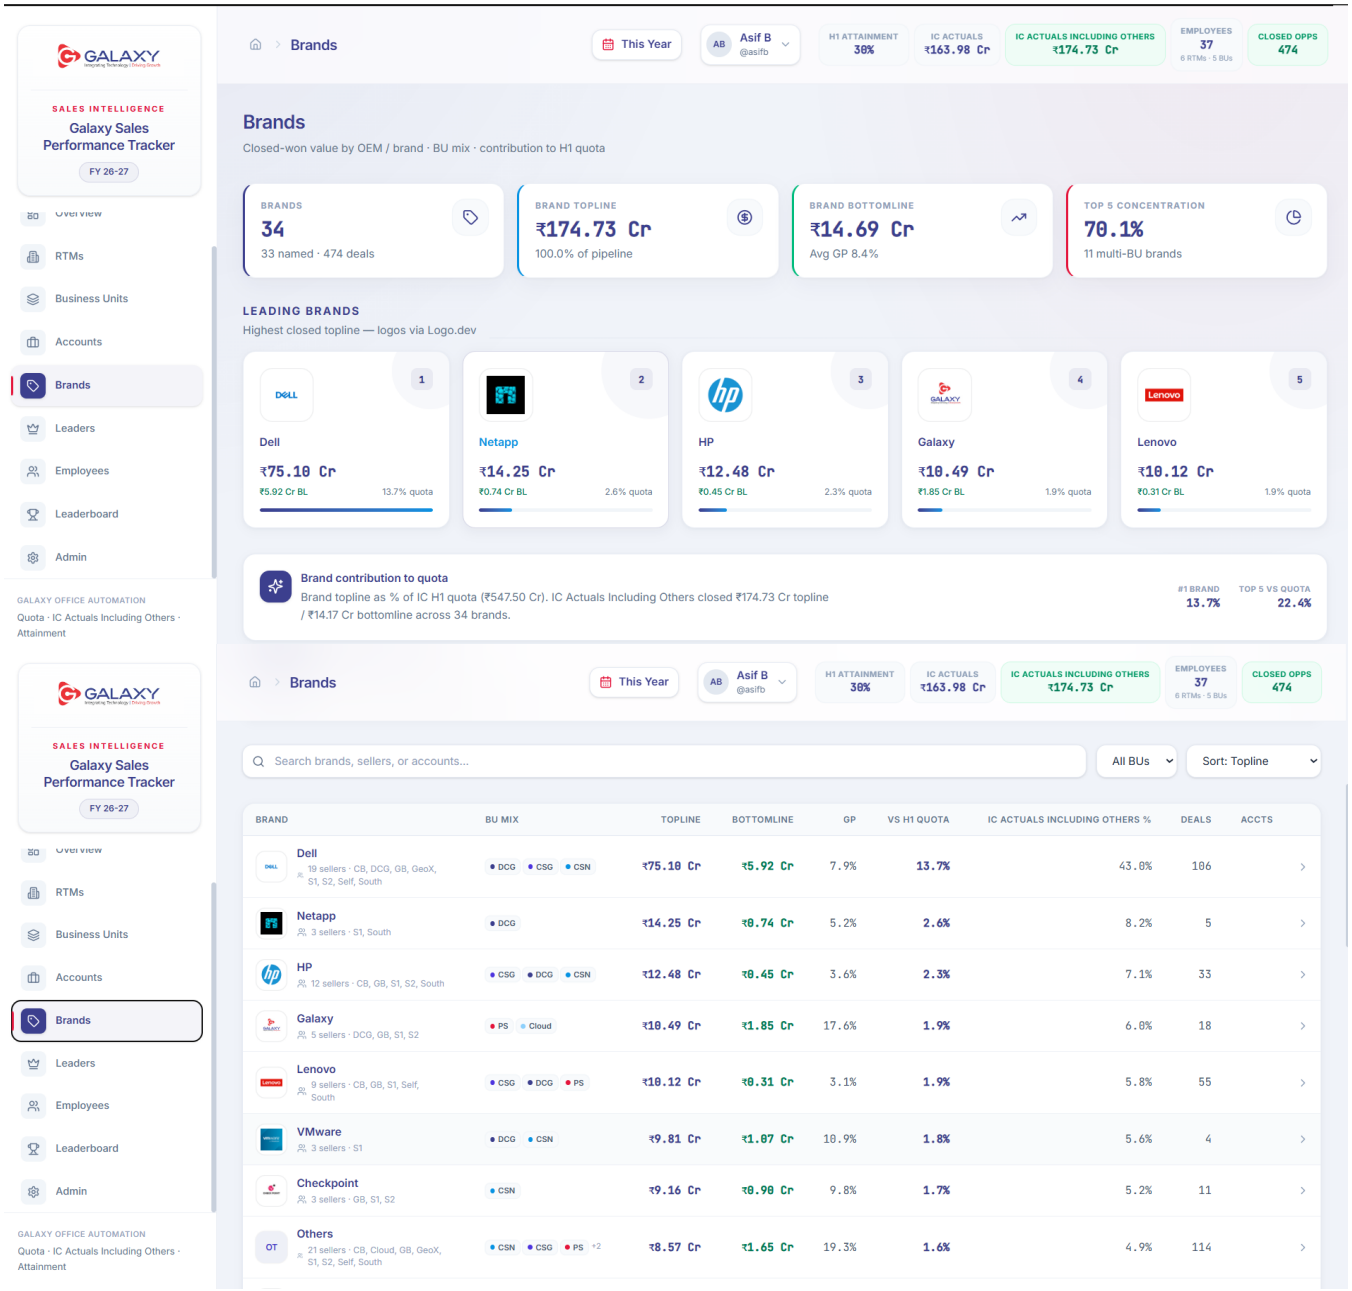

3.4 Accounts Page

Ranks customer accounts by revenue closed for the selected period. Each row shows revenue, deal count, GP, and GP%.

- Expand an account to see the BU breakdown (DCG, CSN, CSG, PS, Cloud split).
- **GP% = Actual Bottomline ÷ Amount × 100.** Only the Actual Bottomline field from Vtiger is used — Estimated Bottomline is not included. If a deal has no Actual Bottomline in Vtiger, it shows ₹0.00 BL.
- Accounts with no Organisation Name in Vtiger appear as "Unnamed Account".

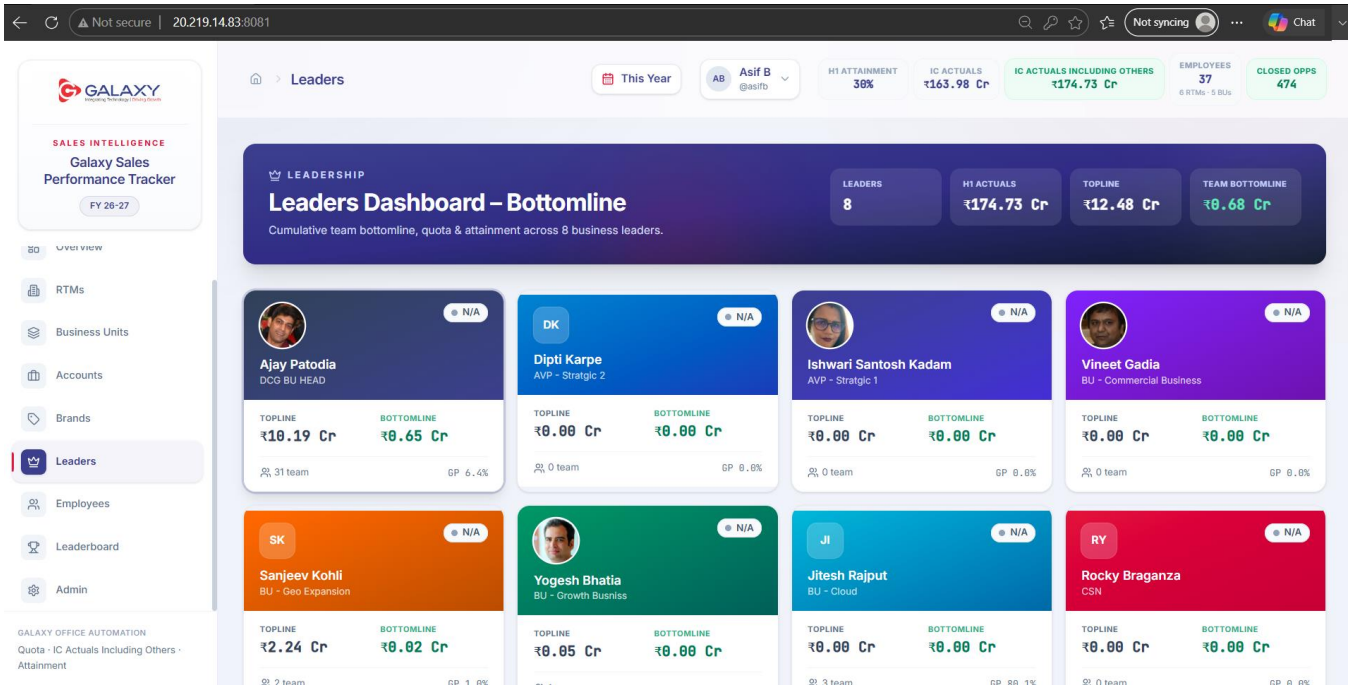

3.5 Brands Page

Shows revenue by OEM brand — Dell, Checkpoint, Lenovo, Hitachi, HP, NetApp, and others.

- Brand is taken from the Brand field in Vtiger. Blank Brand = "Unclassified".
- Each brand card shows total revenue, deal count, and top accounts for that brand in the selected period.

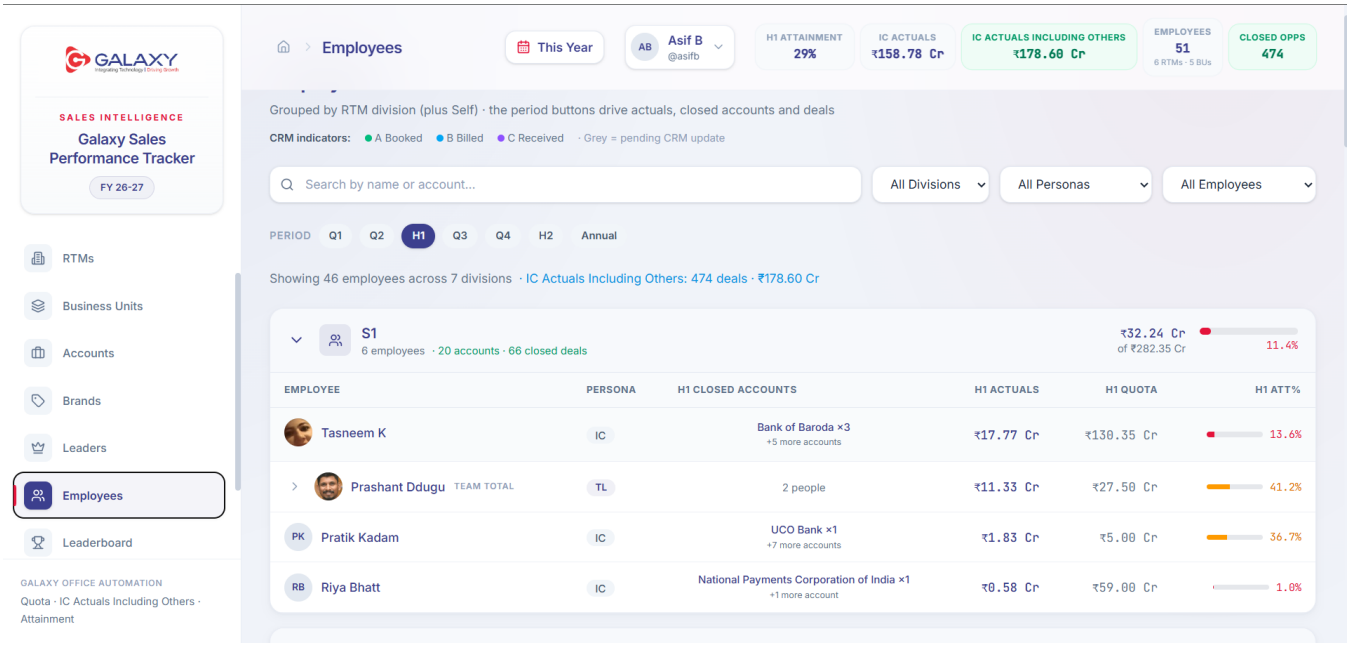

3.6 Leaders Page

Shows BU Heads and AVPs. Each leader card displays their team members, the divisions they oversee, actuals, and their top deals for the selected period.

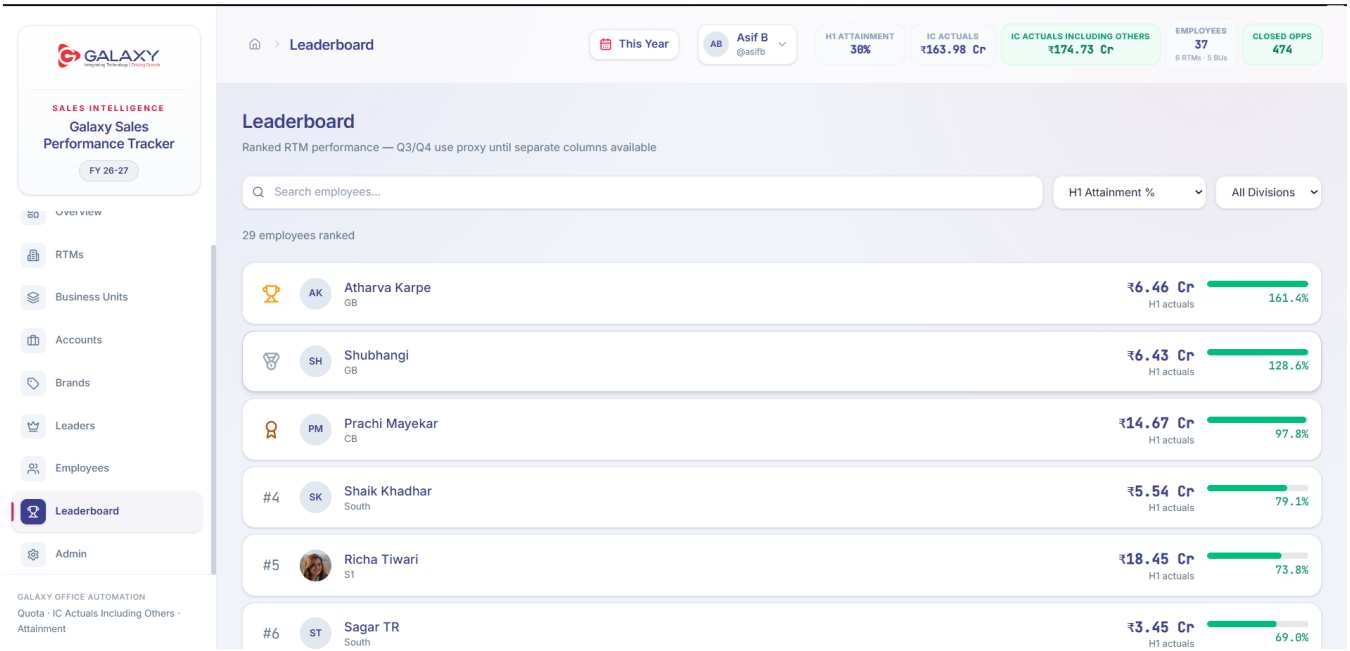

> 📌 The Leaders page header shows "Bottomline" for context, but the Actuals tile uses Topline (revenue) figures — specifically IC Actuals scoped to that leader's login. This is intentional.
>
> ℹ️ Some BU Heads may show "No own deals" on their card if they have no deals led by them in Vtiger for the period. This is expected — their value is in team leadership, not personal pipeline.
>
> 👁 The Leaders page and the "IC Actuals Including Others" header tile are hidden for IC (User) and Team Lead logins — they see only their own IC Actuals.

3.7 Employees Page

Shows every IC grouped by division — one row per rep, showing quota, actuals, attainment %, and deal pipeline for the selected period.

3.8 Leaderboard Page

Employees Page

Shows every IC and Team Lead grouped by RTM division — one row per person, showing quota, actuals, attainment %, and closed accounts for the selected period.

- Team Leads are shown with a TL badge inside their division group.
- People who report to a Team Lead are nested under that TL row.
- BU Heads and AVPs are not shown here — they appear on the Leaders page instead.
- A "Self" section at the bottom lists sellers who operate outside any RTM (e.g. Yusufali Petiwala). This group carries a "Not an RTM" badge and its figures are never added to RTM totals.
- Rows marked "Not counted in RTM total" are BU Heads visible for reference only.

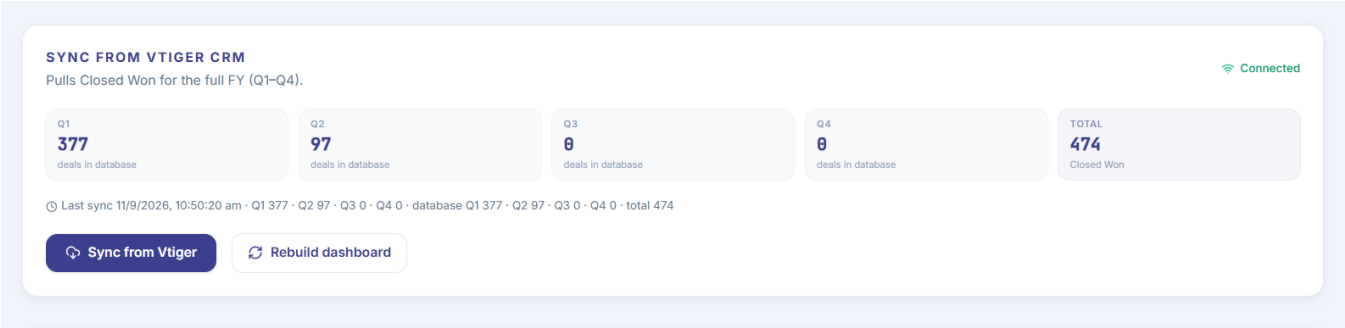

Why a rep might show zero actuals

Cause	What to do
Name mismatch	Rep's Vtiger name does not match the alias table. Ask Admin to add the alias in Admin → Aliases.
No Closed Won deals	Rep has pipeline but nothing at "Closed Won" stage yet.
Wrong period selected	Try switching to H1 or Annual to widen the window.
Sync not run	A new deal closed after the last sync. Ask Admin to run a sync.

4. Admin Functions

> This section is for Admin users only. If you do not see the Admin menu in the sidebar, contact your Admin.

4.1 Syncing from Vtiger CRM

The dashboard does not update automatically. Data refreshes only when an Admin runs a manual sync.

How to run a sync

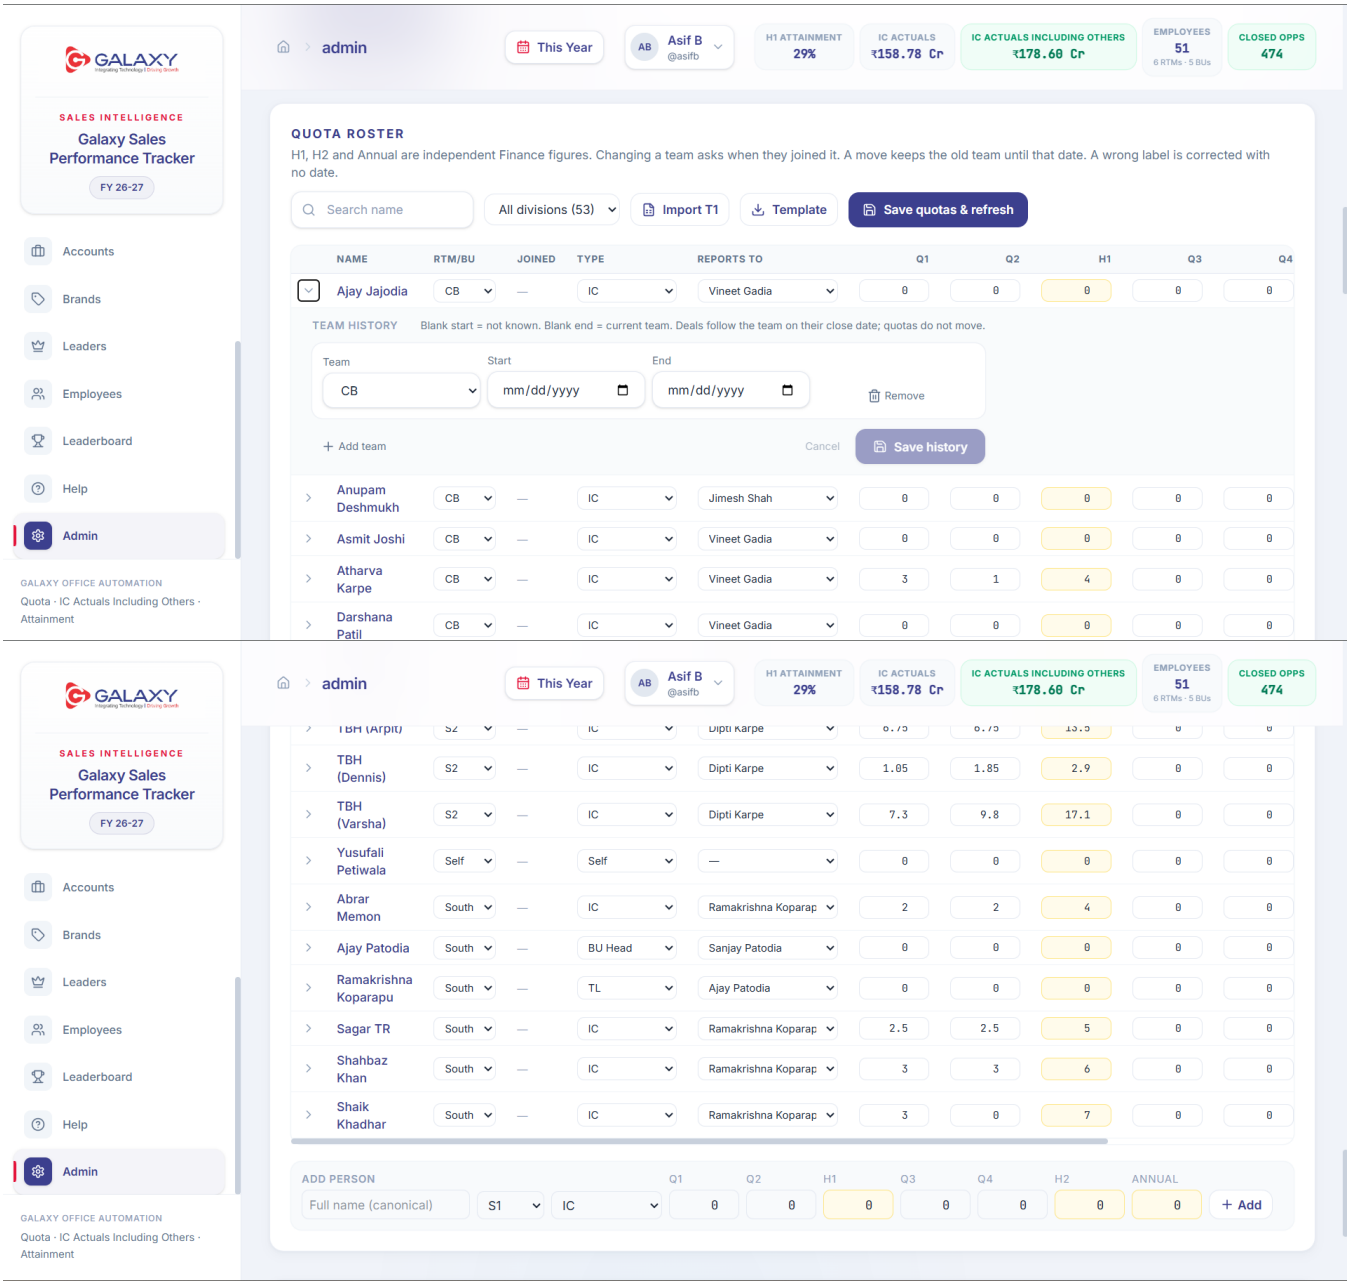

6. Go to Admin → Sync in the sidebar.
7. Click Sync from Vtiger. The sync pulls all Closed Won deals for the full financial year (Q1–Q4) in one action.
8. Do not close the browser tab while syncing.
9. When complete, a confirmation shows deal counts per quarter and the sync timestamp.

What the sync does

- Pulls all Closed Won opportunities from Vtiger for the full FY (Q1–Q4).
- Maps Opportunity Led By to a canonical rep name using the alias table.
- Reads Amount, Actual Bottomline, Category, Brand, and Organisation Name per deal.
- Updates all views: Overview, RTMs, BUs, Accounts, Brands, Leaders, Employees, Leaderboard.

> ⚠ A failed sync does not corrupt existing data. The previous sync remains active. Contact the development team if errors persist.

4.2 Editing the IC Quota Roster

The IC Quota Roster is the only place quota figures exist in the platform — they do not come from Vtiger. Finance owns these numbers.

Editing a rep's quota

1. Go to Admin → Quotas.
2. Find the rep by name or use the division filter.
3. Click the cell to edit (Q1, Q2, H1, H2, Annual etc.) and enter the value in ₹ Crore.
4. Click Save quotas & refresh.

> ⚠ H1, H2, and Annual are independent Finance figures — do not treat them as auto-sums of Q1+Q2 or Q3+Q4. Saving overwrites immediately. There is no undo. Verify the correct figure before saving.

Transferring a rep to a different RTM

When a rep moves between divisions, use the RTM field on their roster row. The system will ask you when they joined the new team.

Option	When to use
They moved (transfer)	The rep genuinely moved teams. The previous RTM record closes the day before, and their deals are attributed based on close date.
The old team was wrong (correction)	The division label was incorrectly set. This corrects only the current assignment in place — past history is preserved.

Adding or removing a rep

Action	Steps
Add a rep	Click Add Person at the bottom of the roster. Fill canonical name, RTM division, type, and quota figures. Then add their Vtiger name to Admin → Aliases.
Remove a rep	Set status to Inactive. Do not delete — historical deals are preserved. Deleted reps appear as "Unnamed Rep" in past views.

4.3 Managing Name Aliases

Every spelling of a rep's name that appears in Vtiger must map to their canonical name in the alias table.

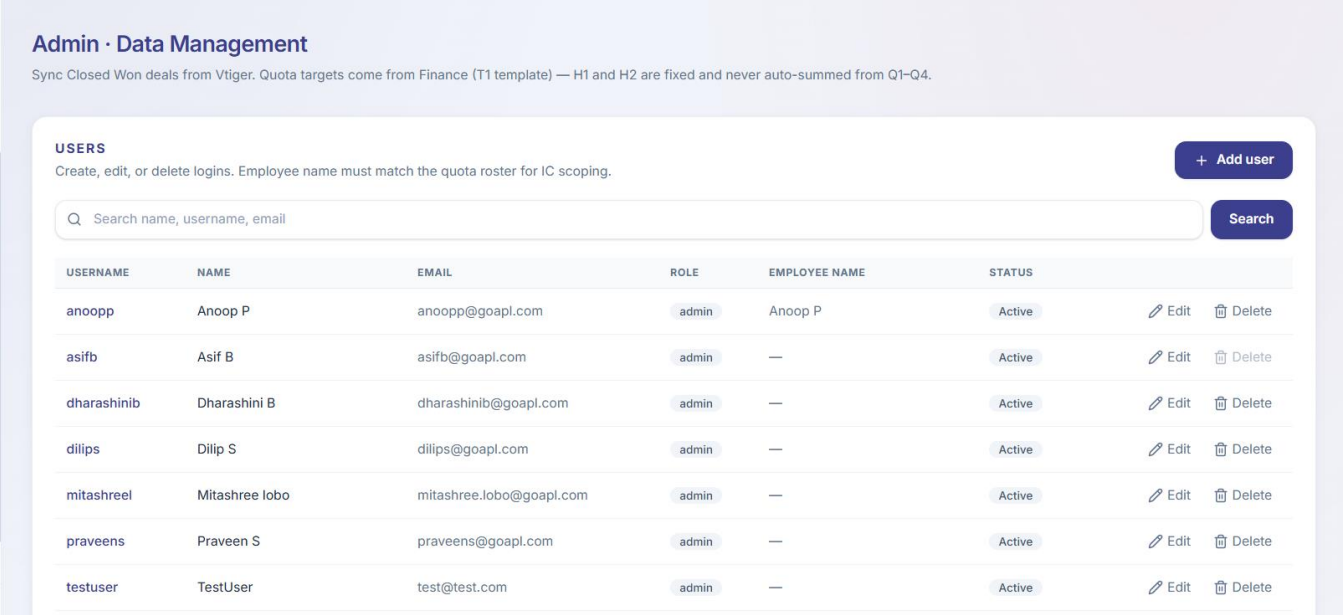

1. Go to Admin → Aliases.
2. Enter the exact Vtiger name string and select the canonical rep name it maps to.
3. After adding, run a sync to confirm the rep's actuals now appear correctly.

4.4 Editing BU Annual Quotas

4. Go to Admin → BU Quotas.
5. Enter Annual Quota (₹ Cr) and GP% target for each BU: DCG, CSN, PS, CSG, Cloud.
6. Save — BU cards reflect the new targets immediately. No sync required.

4.5 Managing User Accounts

> ★ **This is a new feature.** Admin can now create, edit, and manage dashboard login accounts directly — including setting usernames, passwords, and roles — without needing command-line access.

Go to Admin → User Management. You will see a table of all current user accounts showing their username, full name, email, role, linked employee name, and status.

Adding a new user

5. Go to **Admin → User Management** and click **+ Add User.**
6. Enter the user's full name and email address. The email becomes their username for login.
7. Set a temporary password. The user should change this on their first login.
8. Assign a role: **User (IC)**, **Leader**, or **Admin.**

9. Optionally link an **Employee Name** — this connects the login to the correct IC row on the quota roster, so the user sees their own numbers when they log in.
10. Click **Save.** The user can now log in with the credentials provided.

Editing an existing user

11. Find the user in the **Admin → User Management** list. Use the search box to filter by name, username, or email.
12. Click **Edit** on their row.
13. Update any combination of: full name, email/username, password, role, employee name link, or active status.
14. Click **Save.** Changes take effect immediately — no sync required.

Roles — what each one means

Role	Access level
User (IC / rep)	Sees only their own data on the Employees page and their personal slice of Overview, RTM, and BU cards.
Leader / TL	Read-only access to their own team and rollup RTM. Sees the Leaders page with their team card.
Admin	Full access — all data, sync, quotas, aliases, and user management.
CEO	Full read-only access to all data. Does not have Admin tools.

> ⚠ If you change a user's role from Admin to User or Leader, they will lose access to the Admin menu immediately — this takes effect on their next page load or login.
>
> ⚠ Fixed privileged accounts (CEO and the named Admin accounts) cannot be deleted — only deactivated. If you need to remove access for a privileged account, set their status to Inactive.

Deleting a user

Click Delete on the user's row and confirm. Notes:

- You cannot delete your own account.
- You cannot delete the last active Admin account.
- Fixed privileged accounts cannot be deleted — deactivate them instead.

If a deleted user was on the quota roster, they may reappear after the next quota save (as an inactive login). Use Inactive status rather than Delete for roster-linked users.

5. Guide for Individual Contributors

5.1 How Your Actuals Are Calculated

> **Your actuals = sum of Amount on all Closed Won opportunities in Vtiger where you are the Opportunity Led By.**

- **Only Closed Won deals count** — deals at other stages are not included.
- **You must be the Opportunity Led By**, not just Assigned To. Assigned-To deals count as Contributed only.
- **Your Vtiger name must match your alias** — if a spelling differs, contact Admin.
- **Bottomline quota exception:** if your quota is on Bottomline (GP), your actuals use the Actual Bottomline field from Vtiger, not Amount.

5.2 Led-By vs Contributed Deals

	Led-By vs Contributed
What it means	Led-By: you are Opportunity Led By. Contributed: you are in Assigned To, but NOT Led By.
Counts in attainment?	Led-By: Yes — full amount. Contributed: No — shown in Contributed column only.
Where visible?	Led-By: your IC row, division total, Overview. Contributed: Contributed column on your Employees card.

5.3 Your Quota Structure

- **H1 Quota** = Q1 + Q2 quota (April–September).
- **H2 Quota** = Q3 + Q4 quota (October–March). Appears as "Estimated" until Admin sets H2 figures.
- **Annual Quota** = H1 + H2. Your full-year target.
- Quota is set by Admin from your individual Target Letter. Contact Admin if it looks wrong.

5.4 Why Your Numbers May Differ from Vtiger

Reason	Explanation
Last sync before your deal	Dashboard updates only when Admin runs a sync. Deals closed after the last sync won't appear yet.
Deal not at Closed Won	Only Closed Won deals count. Update the stage in Vtiger.

Name mismatch	Your Vtiger spelling doesn't match the alias. Ask Admin to check Admin → Aliases.
Contributed, not Led By	Only Led By deals count towards attainment. Contributed deals appear separately.
No Actual Bottomline in Vtiger	If your deal's Actual Bottomline field is empty in CRM, it shows ₹0.00 BL on the dashboard until Finance enters it.
Vtiger = Billing; dashboard = Booking	Dashboard tracks deal Amount at close (Booking), not billing milestones.

---

6. Frequently Asked Questions

6.1 Data and Numbers

Q: Why are there three different revenue totals on the Overview page?

A: Each total measures something different. IC Actuals = RTM ICs and TLs only, BU Heads excluded. Including Others = IC Actuals plus BU Heads, AVPs, and Self sellers. BU Donut = amount by category from RTM-team deals only. See Section 2.1 for a full explanation.

Q: My deal closed in Vtiger but it's not showing on the dashboard.

A: Four possible causes: (1) The sync hasn't run since you closed the deal — ask Admin. (2) Your deal is not at "Closed Won" stage. (3) Your Vtiger name doesn't match the alias list — contact Admin. (4) The deal falls in a quarter that hasn't been synced yet.

Q: Why does my PS deal show a higher quota credit than its invoice value?

A: PS primary focus area deals carry a 2× multiplier. A ₹1 Cr managed services deal counts as ₹2 Cr towards quota credit. The dashboard shows actual revenue on the actuals tiles. See Section 2.4.

Q: What does "Estimated" mean on Q3 and Q4?

A: Q3 and Q4 data has not been synced from Vtiger yet. Figures shown are zero or projections. Do not use Estimated figures for formal performance reviews.

Q: Why is BU attainment different from RTM attainment for the same period?

A: RTM counts IC and TL deals only. BU counts every deal in that category from RTM-team members. BU Heads' own deals are excluded from both, so the totals should align.

Q: My deal's Bottomline shows ₹0.00. Why?

A: The dashboard uses only the Actual Bottomline field from Vtiger — not the Estimated Bottomline. If Finance has not yet entered the Actual Bottomline for your deal in Vtiger, it will show ₹0.00 until they do.

6.2 My Numbers (for ICs)

Q: Why do I only see my own data?

A: You have a User (IC) role. Overview, RTM, and BU cards show only your personal slice. Contact Admin if you need broader access — role changes require management approval.

Q: A deal I contributed to isn't in my attainment total.

A: Correct — contributed deals (Assigned To, not Led By) appear in your Contributed column only. Only Led By deals count towards attainment.

Q: My H2 quota shows "–" or zero.

A: H2 quotas are set by Finance at the start of the second half. If it's still blank, contact Admin.

Q: I was moved to a different RTM. Will my old deals still appear?

A: Yes — deal attribution follows the close date. Deals you led before the move count under your old RTM for those periods; deals after the move count under the new RTM. Your quota history is preserved.

6.3 Sync and Data Freshness

Q: How often is the dashboard updated?

A: Only when Admin manually runs a Vtiger sync. There is no automatic sync. The last sync timestamp is shown on the Admin sync panel.

Q: Can I trigger a sync myself?

A: No — only Admin role users can run a sync. If an urgent update is needed, ask your Admin.

Q: The sync ran but my numbers haven't changed.

A: No new Closed Won deals were found in Vtiger since the last sync. Check deal stages in Vtiger.

6.4 Quota and Targets

Q: I need to update my quota. Who do I contact?

A: Contact Admin. Quota changes are Finance-owned and take effect immediately after saving — no sync required.

Q: The quota shown is wrong.

A: Contact Admin. Verify against your Target Letter first — the dashboard quota is set directly from Finance's figures.

Q: My annual quota is not equal to H1 + H2 added together.

A: This is correct. H1, H2, and Annual are independent Finance-owned figures. They are not auto-summed. Contact Admin if any of them needs correcting.

6.5 Access and Roles

Q: I can't see the Admin menu.

A: You do not have the Admin role. Contact Admin if you need this access.

Q: I cannot log in.

A: Try the Forgot Password link on the login screen. If that fails, contact Admin to reset your password via Admin → User Management.

Q: My session expired in the middle of my work.

A: Sessions last 2.5 hours. After that you are automatically signed out. Log in again to continue. If your laptop went to sleep, the sign-out triggers when you return.

Q: I can't see the Leaders page.

A: The Leaders page is hidden for IC (User) and Team Lead roles. Only Leader, Admin, and CEO roles can see it.

6.6 Names and Rep Mapping

Q: A rep's actuals show zero even though they have closed deals.

A: Almost always a name alias issue. The rep's Vtiger name doesn't match the alias table. Ask Admin to go to Admin → Aliases and add the correct mapping.

Q: A new rep joined. What needs to happen before their deals appear?

A: Admin must: (1) Add them to the IC Quota Roster (Admin → Quotas → Add Person) with RTM division, type, and quota figures. (2) Add their Vtiger name to the alias table. (3) Create their login in Admin → User Management. Then run a sync.

Q: A rep left the company. What happens to their deals?

A: Set them to Inactive in the Quota Roster. Do not delete — historical deals are preserved. Their login should also be set to Inactive in Admin → User Management.

---

7. Quick Reference

7.1 Key Contacts

Need	Contact
Quota change / correction	Admin team — Finance owns the figures; Admin updates them
Name alias / rep not appearing	Admin team — provide the exact Vtiger name + canonical roster name + division
Urgent sync request	Admin team — state which quarter to sync
New user account / password reset	Admin team — Admin → User Management
Bug or technical issue	Development team — share screenshot and steps to reproduce
Login / access problem	Admin team first, then development team
Business question about a number	Your BU Head or AVP

7.2 Glossary

Term	Definition
Actuals	Sum of Amount on all Closed Won deals for a rep or group in a given period.
Attainment %	Actuals ÷ Quota × 100. The primary performance metric.
Actual Bottomline	Gross Profit as entered in the Actual Bottomline field in Vtiger. Estimated Bottomline is not used.
Booking	A Closed Won deal — revenue that has been contracted. The dashboard tracks Bookings only.
BU Head	A business unit head (e.g. DCG, Cloud). Excluded from RTM actuals and quotas; appears on the Leaders page.
Canonical name	The standardised rep name used on the dashboard. All Vtiger name variants map to this via the alias table.
Closed Won	Vtiger opportunity stage = deal contracted and booked. Only these deals appear on the dashboard.
Contributed deal	A rep is in Assigned To but not Opportunity Led By. Not counted in attainment.

GeoX	Geo Expansion division. One of the six RTMs.
H1 / H2	First half (April–September) and second half (October–March). Set independently by Finance.
IC	Individual Contributor — a rep carrying a personal quota. Counted in RTM actuals.
Led By	Opportunity Led By in Vtiger — the rep credited with the deal. Determines actuals attribution.
Multiplier	Quota credit factor for specific deal types: PS 2×, CSN 1.3×, DCG Storage 1.2×.
RTM	Route to Market — the six sales divisions: S1, S2, CB, GB, South, GeoX.
RTM transfer	Moving a rep between divisions. Deals are attributed by close date to the division active at the time.
Self	A seller outside any RTM division (e.g. Yusufali Petiwala). Never counted in RTM totals.
Sync	Admin-triggered process that pulls Closed Won data from Vtiger into the dashboard.
TL	Team Lead — a senior IC who carries a team-level quota and has ICs reporting to them.
Topline	Revenue — the full invoice Amount. Contrast with Bottomline (GP).
User Management	Admin panel at Admin → User Management. Used to create, edit, and deactivate login accounts.
