1. Overview

The Galaxy Performance Tracker is the central dashboard for monitoring sales quota performance across all divisions, business units, brands, and individual contributors. It pulls live data directly from the Vtiger CRM and replaces manual Excel-based quota tracking.

1.1 What is the Galaxy Performance Tracker?

In one place you can see:

- How much each rep has booked against their quota for any period (Q1, Q2, H1, H2, Annual).
- How each division and business unit is tracking relative to target.
- Which customer accounts and OEM brands are driving the most revenue.
- How individual performance ranks across the entire team.

1.2 Roles and Permissions

Access to data on the dashboard depends on the role assigned to your account.

Role	What they can see
Admin	Everything — all reps, all divisions. Plus: Sync from Vtiger, edit quotas, manage the IC roster and aliases.
Leadership	All pages and all data. Read-only. Sees the Leaders page with their own team card.
User (IC / rep)	Their own numbers on the Employees page only. Cannot see other reps' data or Admin functions.

1.3 Logging In

Open the application using the URL shared by your Admin. Chrome, Safari, or Edge are recommended.

Steps to Log In:

1. Open the application URL in your browser.
2. Enter your registered Email Address and Password.
3. Click Sign In.
4. If you forget your password, use the Forgot Password link on the login screen.

> Do not share your login credentials. Each user must have their own account. Contact Admin to set up new users.

1.4 The Financial Year and Quarter System

The financial year runs from **April to March**, divided into two halves (H1 and H2) and four quarters (Q1–Q4).

Period	Months covered
Q1	April – June
Q2	July – September
H1	April – September (Q1 + Q2)
Q3	October – December (labelled Estimated until synced)
Q4	January – March (labelled Estimated until synced)
H2	October – March (Q3 + Q4)
Annual	Full financial year (H1 + H2)

2. Understanding the Numbers

2.1 The Three Revenue Totals

> ⚠ This is the single most important concept before reading any number on the dashboard. There are three distinct revenue totals — all correct, all measuring different things.

Revenue Total	What it includes
IC Actuals (RTM ICs)	Closed Won deal amounts for all RTM Individual Contributors. Reps on a Bottomline quota are counted on GP, not revenue.
Including Others	All Closed Won amounts — RTM ICs plus BU Heads, AVPs, and any other staff with pipeline deals.
BU Donut / Category Total	All Closed Won amounts grouped by Vtiger Category (Data Centre, CSN, CSG, PS, Cloud). Includes every deal regardless of who led it.

2.2 Attainment %

> **Attainment % = Actuals ÷ Quota × 100**

Example: If your H1 quota is ₹50 Cr and you have closed ₹22 Cr, your attainment is 44%.

- **Actuals** = sum of Amount on all Closed Won opportunities in Vtiger for the period.
- **Quota** = the figure set by Admin in the IC Quota Roster for that period.
- If quota is blank, attainment shows "–" rather than 0%.

2.3 Status Colours

Colour / Status	Attainment threshold
On Track	≥ 50% — Performing at or above the mid-point
At Risk	30%–49% — Behind pace, needs attention
Critical	Below 30% — Significantly behind, management review needed

2.4 Revenue Multipliers

Multipliers apply to quota credit only — they do not change the actual revenue figure displayed on the dashboard.

Deal type	Multiplier
PS — Primary focus areas (Managed Services, SOC, Cloud, Automation, Deployment)	2.0×
CSN — Cyber Security & Networking (all sub-categories)	1.3×
DCG — Backup & Storage sub-categories	1.2×
All other deals	1.0× (no multiplier)
PS — Secondary areas (Residency, 3rd party AMC, Day-2, T&M)	Excluded — does not count towards quota

2.5 The Period Toggle

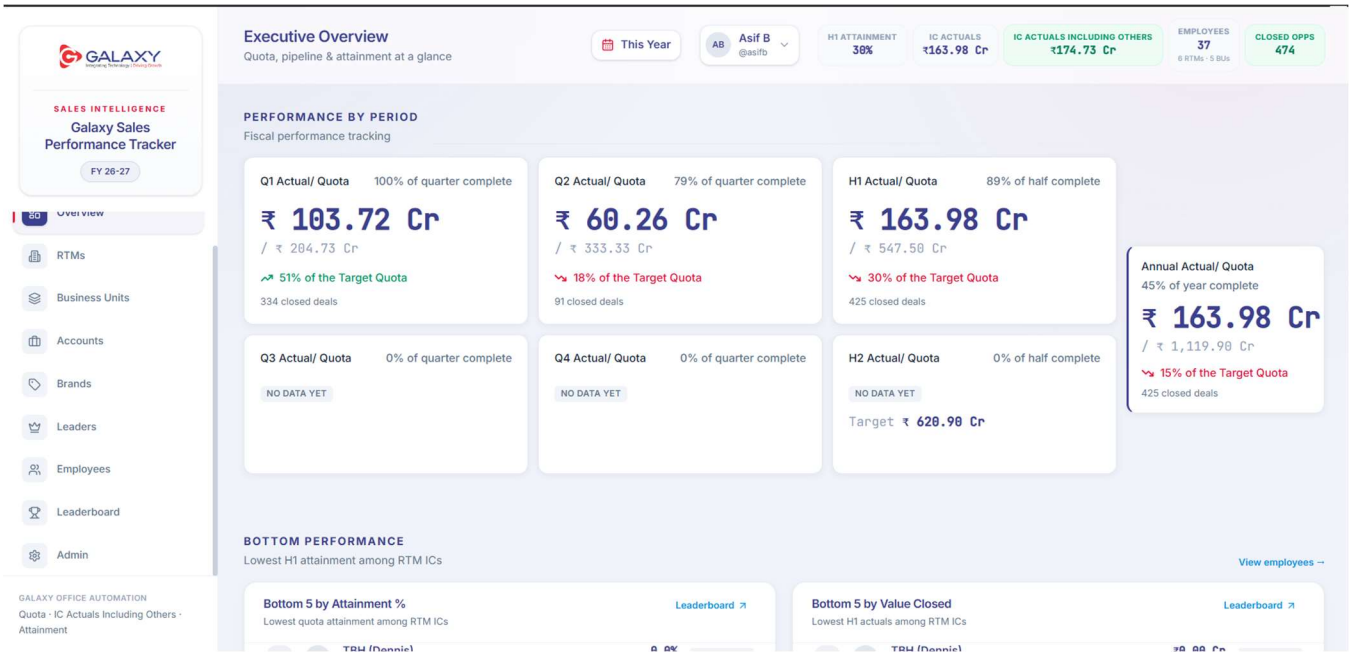

Every page has a period toggle at the top. Switching it recalculates all numbers on that page — quotas, actuals, attainment %, deal counts, and rankings.

- **Q1, Q2, Q3, Q4** — single quarter view.
- **H1, H2** — six-month half-year view.
- **Annual** — full financial year.
- **"Estimated"** — appears on Q3 and Q4 until Admin runs a sync. Do not use Estimated figures for formal reviews.

---

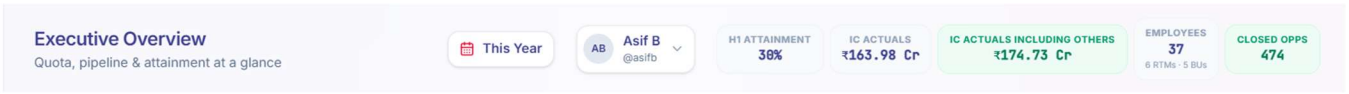

3. Dashboard Pages

3.1 Overview Page

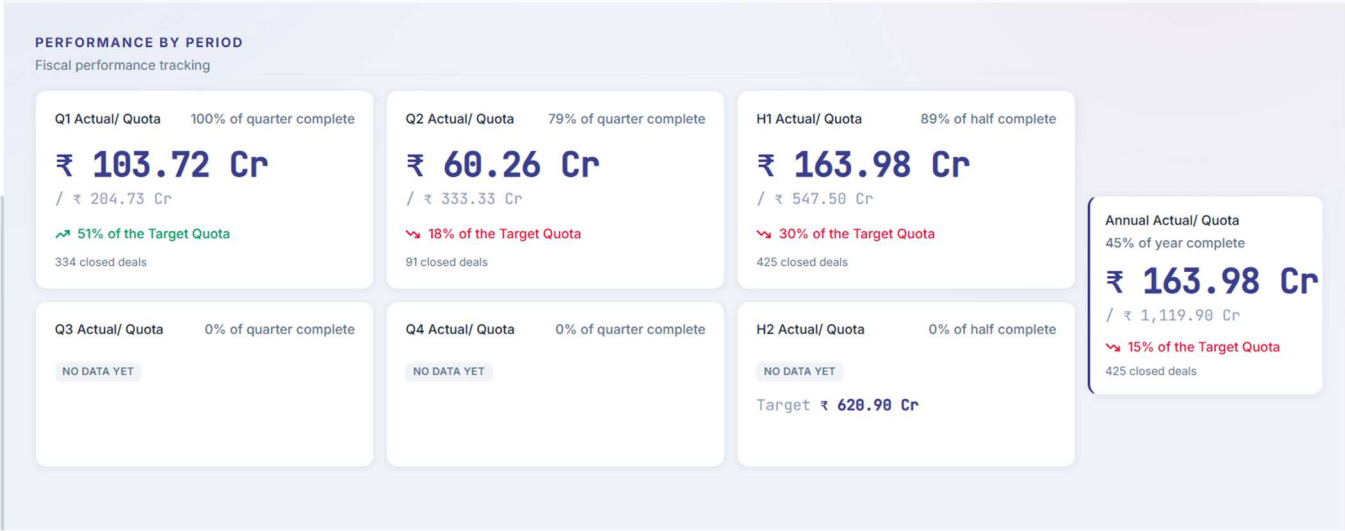

The Overview page is your starting point. It shows the health of the entire business in one view.

Header KPI Tiles

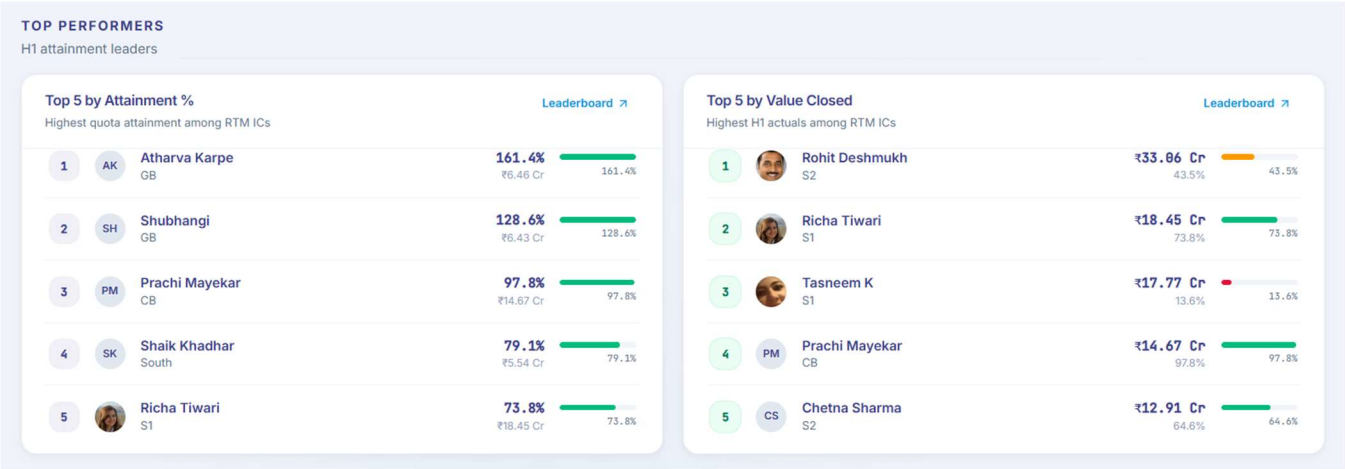

Tile	What it shows
IC Actuals	Total revenue closed by RTM Individual Contributors for the selected period.
Including Others	IC Actuals plus BU Heads, AVPs, and any other staff with pipeline deals.
Closed Opportunities	Count of Closed Won deals for the selected period.
Attainment %	IC Actuals ÷ IC Quota × 100 for the selected period.

Period Metrics Cards

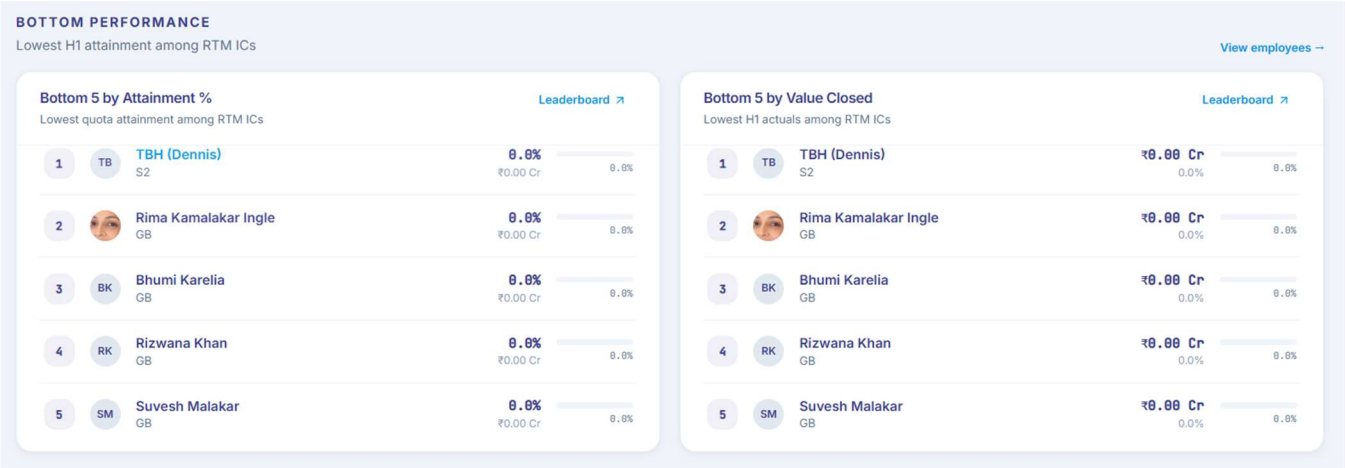

Seven period cards (Q1, Q2, Q3, Q4, H1, H2, Annual) display deal count and revenue for each period. The cards update dynamically when you change the period toggle, highlighting the currently selected period.

Top Attainers Widget

Lists the top Individual Contributors ranked by attainment % for the selected period.

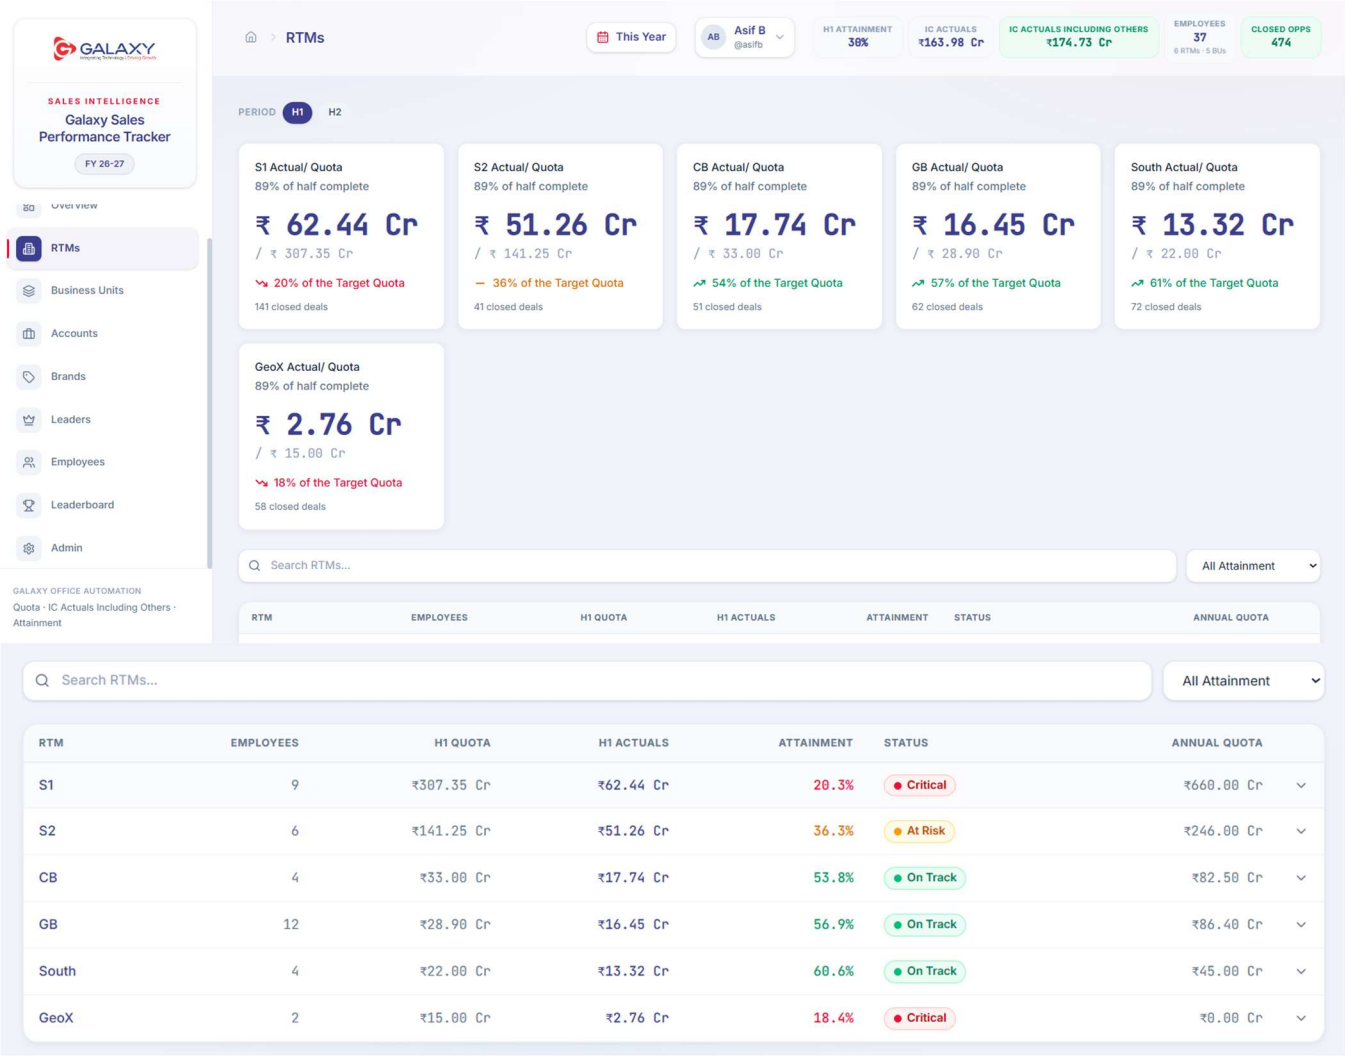

At-Risk and Critical ICs Widget

Lists ICs whose attainment % falls below the On Track threshold, split into two groups:

- **At Risk** — attainment 30–49%. Pipeline conversation needed.
- **Critical** — attainment below 30%. Immediate management review required.

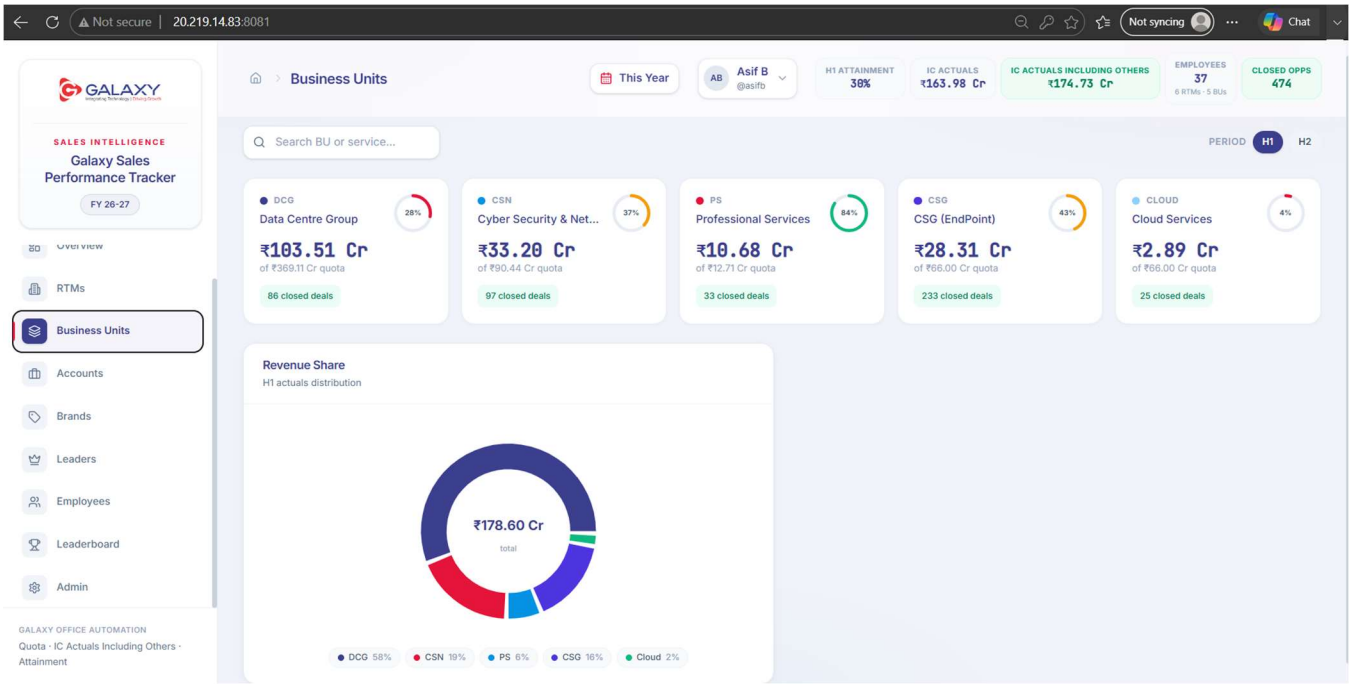

3.2 RTM — Route to Market Page

Shows performance by sales division: S1 (Strategic 1), S2 (Strategic 2), CB (Commercial Business), GB (Growth Business), South, and GeoX (Geo Expansion).

- Each division card shows quota, actuals, attainment %, and deal count for all available periods (Q1–Q4, H1, H2).
- The status colour (Green / Amber / Red) reflects the division's attainment for the selected period.
- Click a division card to see the IC-level breakdown within that division.

3.3 Business Units Page

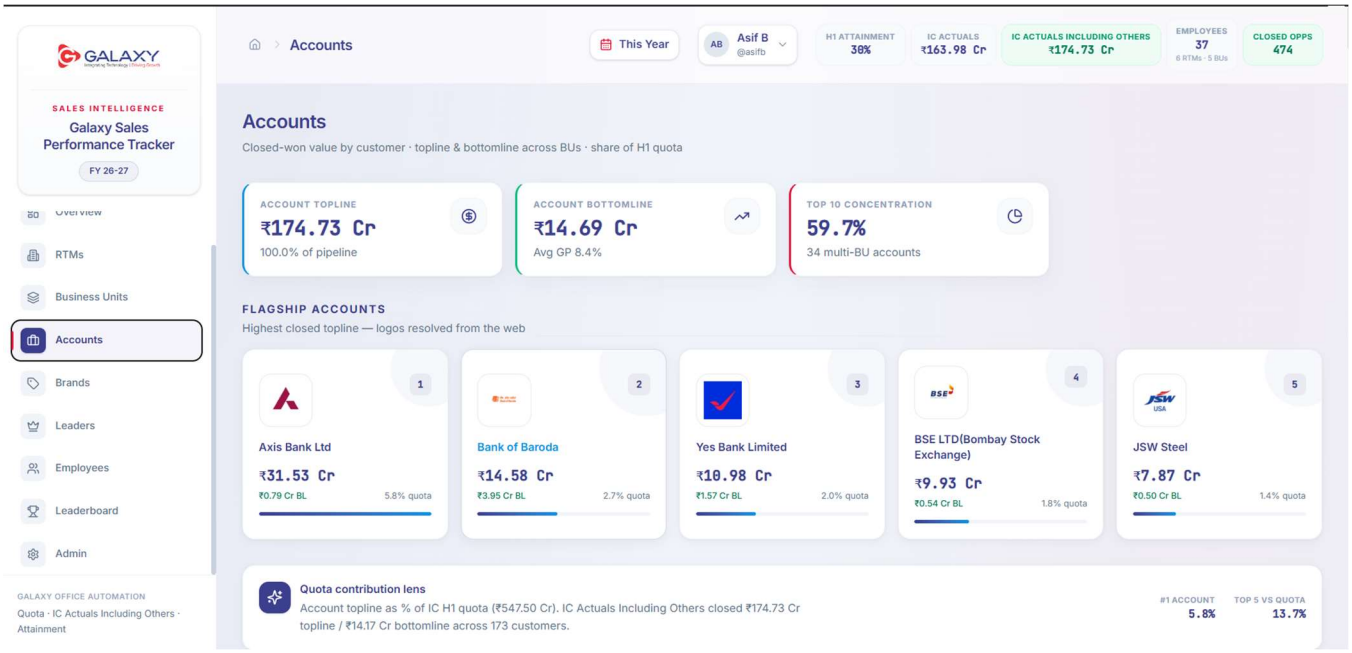

Cuts the data by what was sold (product category) rather than who sold it. The five BUs are DCG, CSN, PS, CSG, and Cloud.

- The donut chart shows revenue split across BUs. Hover over a segment to see value and percentage.
- A deal falls into a BU based on its Category field in Vtiger. Blank Category = "Unclassified".

> ℹ BU attainment may differ from RTM attainment: RTM counts IC deals only; BU counts every deal in that category, including those led by BU Heads.

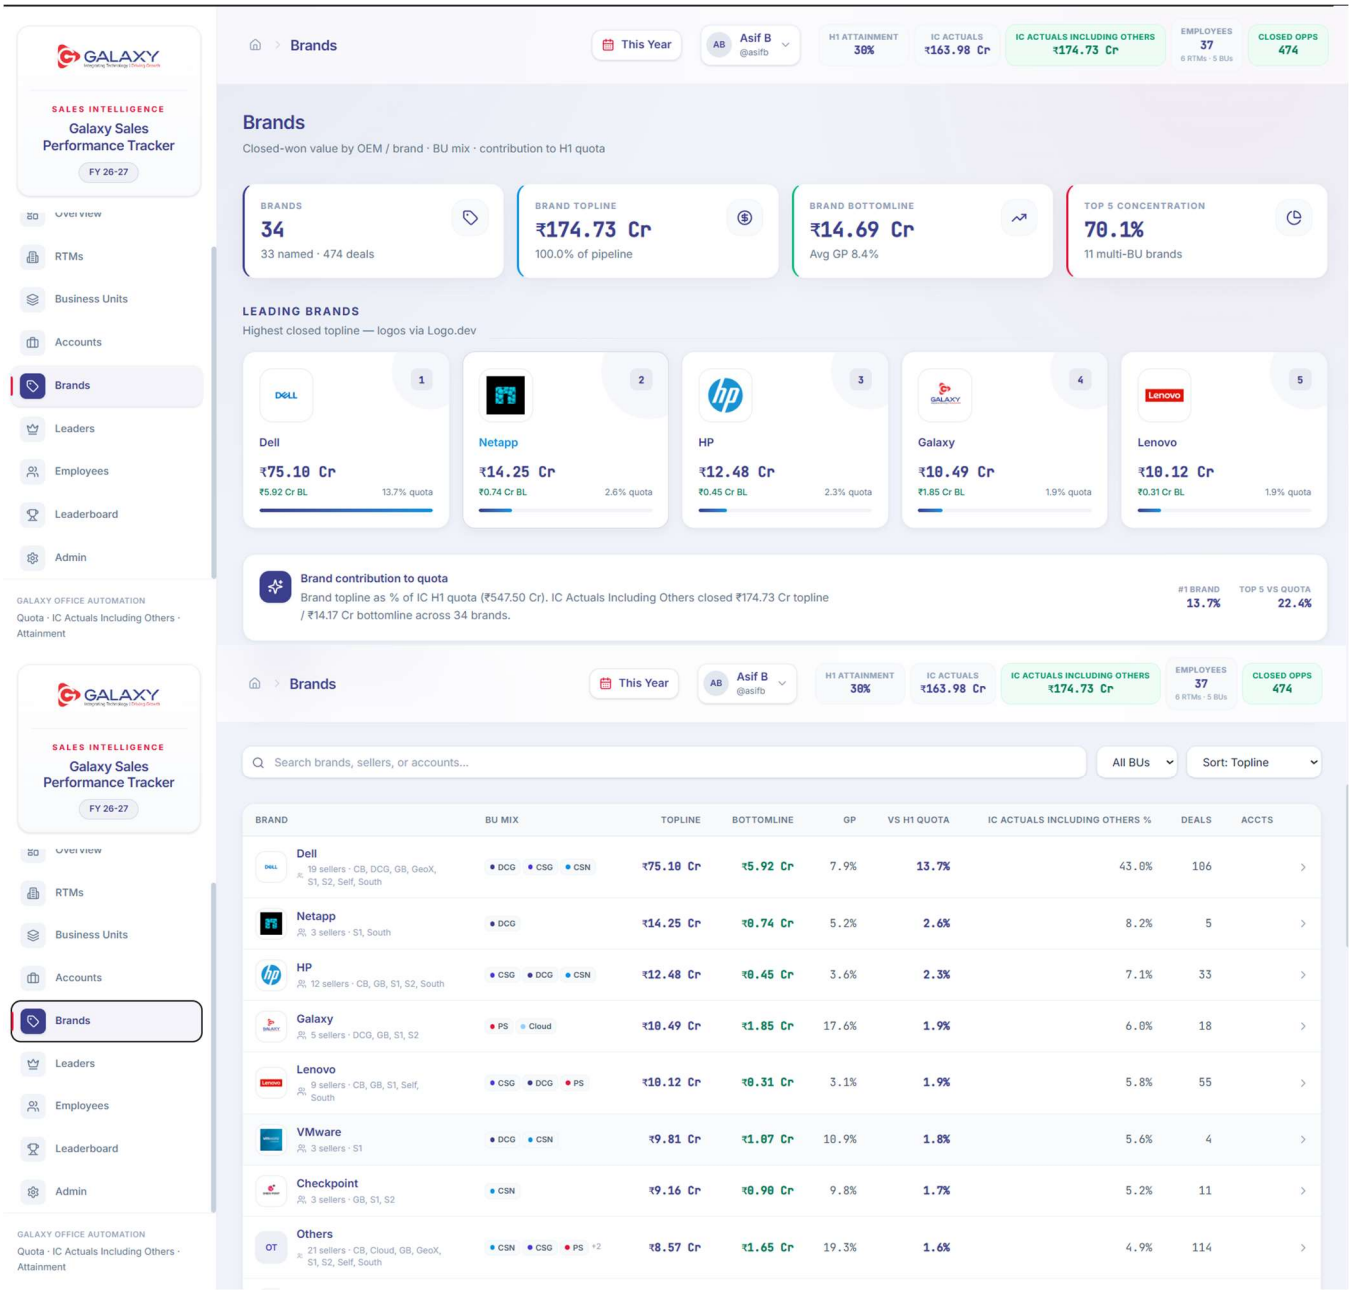

3.4 Accounts Page

Ranks customer accounts by revenue closed for the selected period. Each row shows revenue, deal count, GP, and GP%.

- Expand an account to see the BU breakdown (DCG, CSN, CSG, PS, Cloud split).
- GP% = Estimated Bottomline ÷ Amount × 100. A high-revenue account with low GP% may warrant a pricing conversation.
- Accounts with no Organisation Name in Vtiger appear as "Unnamed Account".

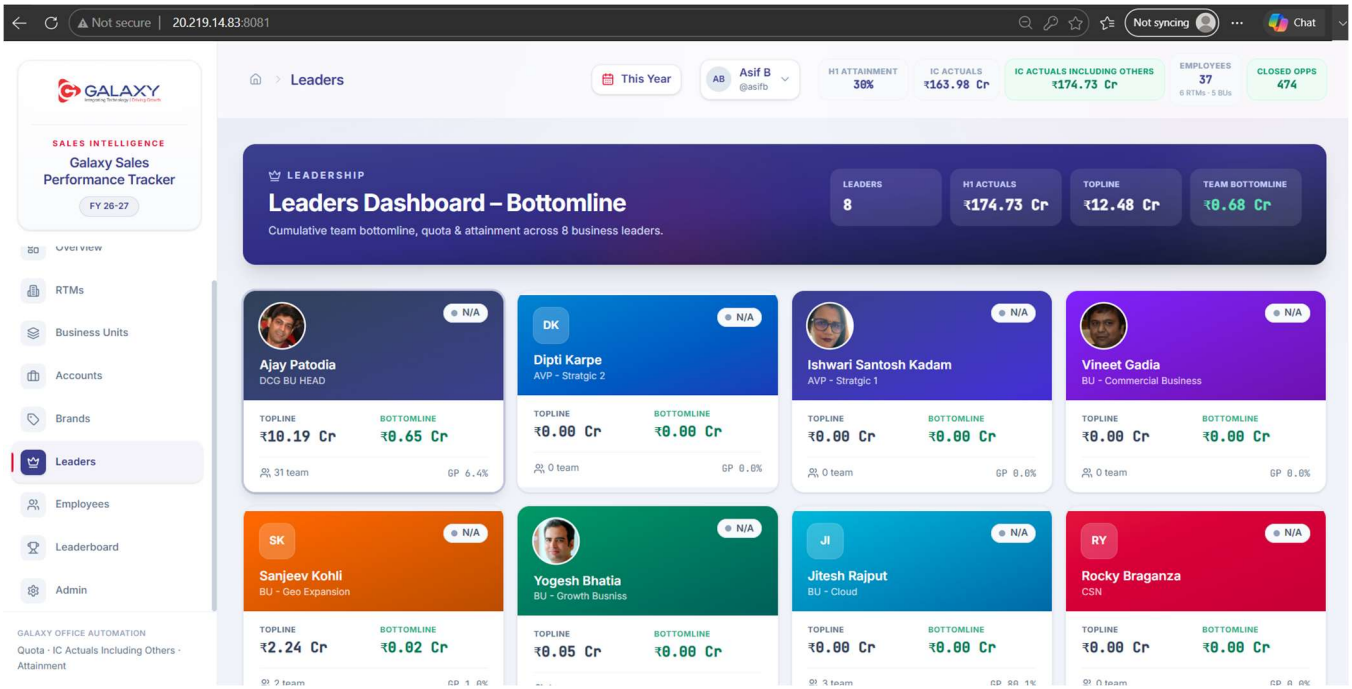

3.5 Brands Page

Shows revenue by OEM brand — Dell, Checkpoint, Lenovo, Hitachi, HP, NetApp, and others.

- Brand is taken from the Brand field in Vtiger. Blank Brand = "Unclassified".
- Each brand card shows total revenue, deal count, and top accounts for that brand in the selected period.

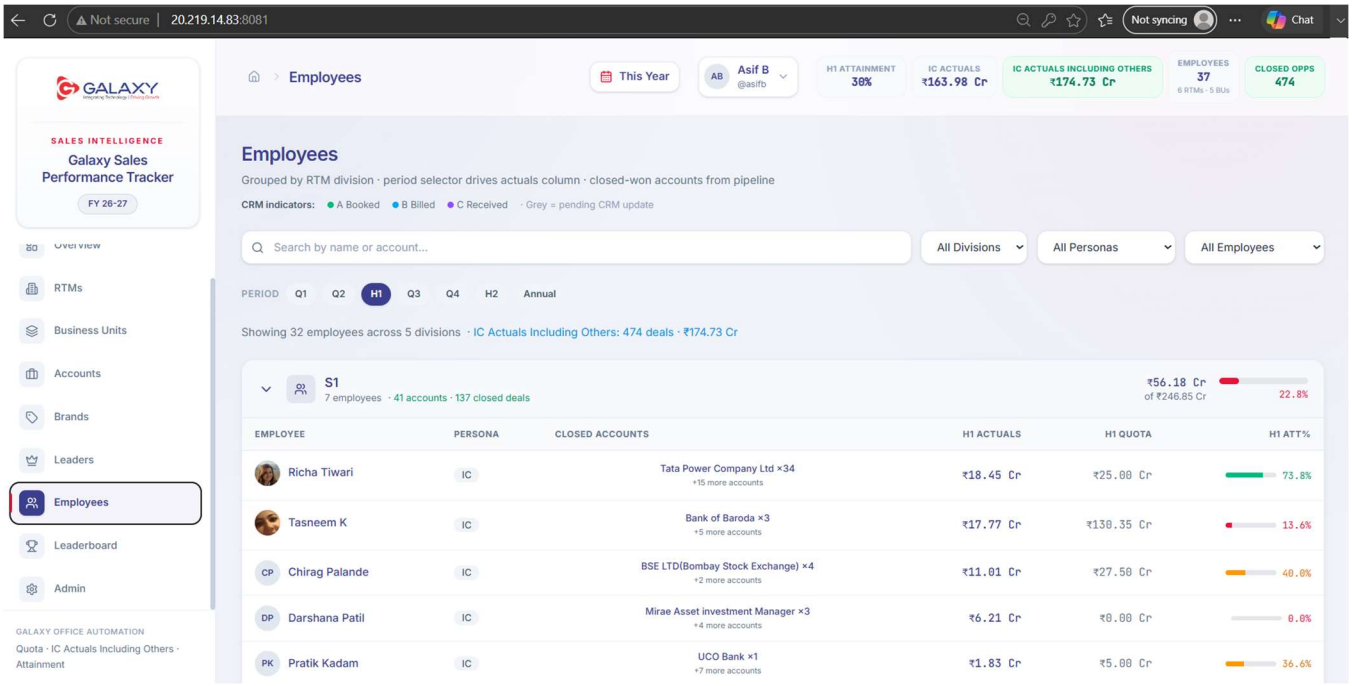

3.6 Leaders Page

Shows BU Heads and AVPs. Each leader card displays their team members, the divisions they oversee, actuals, and their top deals for the selected period.

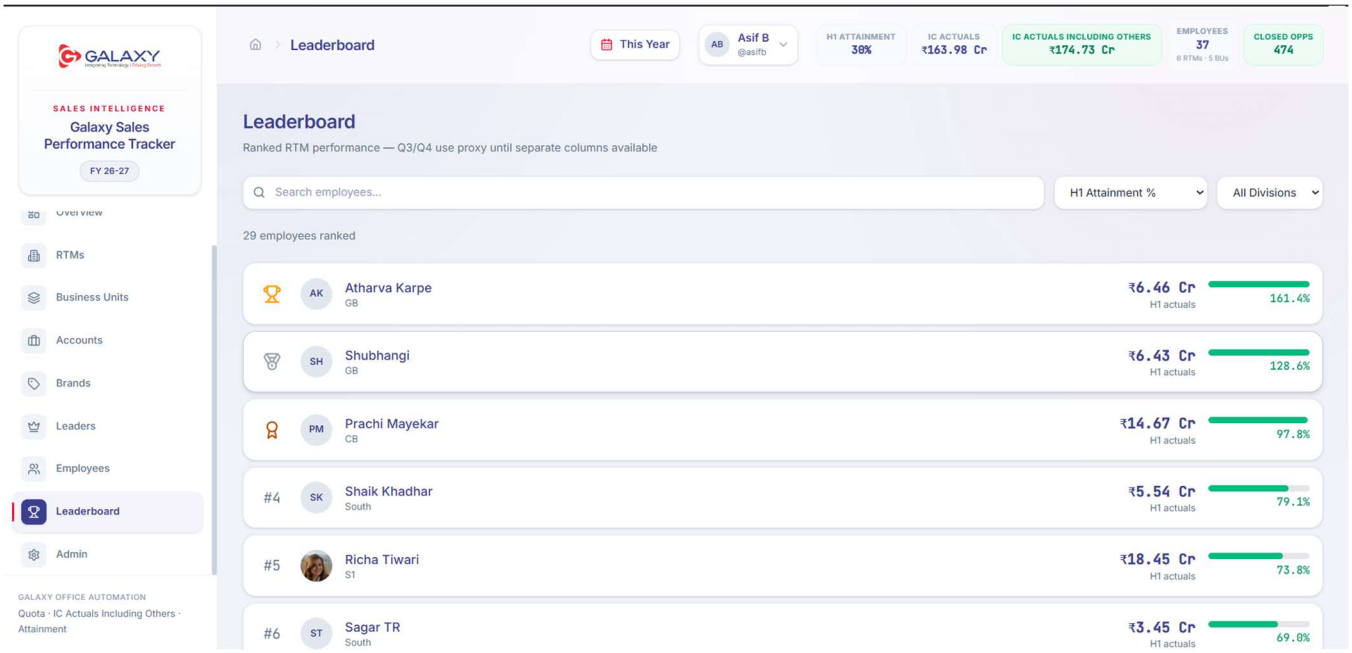

> 📌 The Leaders page header shows "Bottomline" for context, but the Actuals tile uses Topline (revenue) figures. This is intentional — the page describes the leaders' accountability focus, while the tile shows pipeline revenue generated.

3.7 Employees Page

Shows every IC grouped by division — one row per rep, showing quota, actuals, attainment %, and deal pipeline for the selected period.

3.8 Leaderboard Page

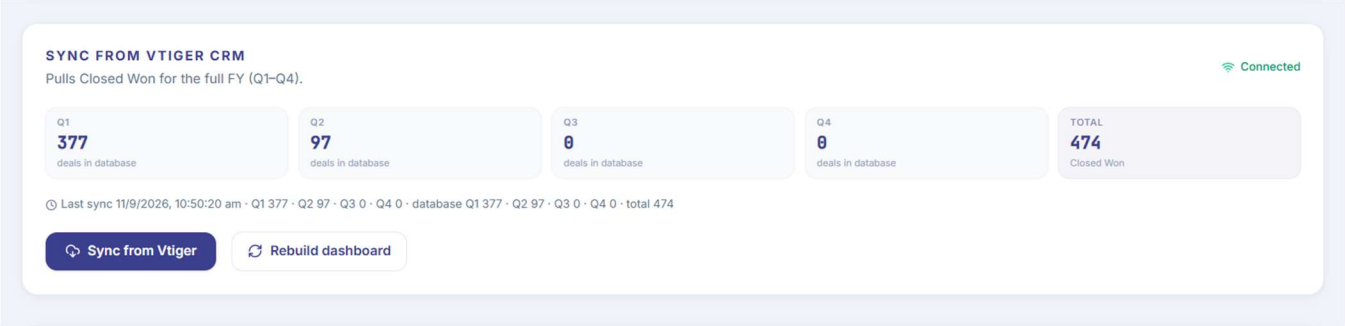

Ranks all ICs by attainment % for the selected period, highest to lowest.

- Rank is based on attainment %, not raw revenue. A rep at 90% of a smaller quota ranks above one at 60% of a larger quota.
- Reps with no quota set are excluded from the ranking.
- Q3 and Q4 rankings are marked "Estimated" until the H2 sync is run — do not use for formal reviews.

4. Admin Functions

> This section is for Admin users only. If you do not see the Admin menu in the sidebar, contact your Admin.

4.1 Syncing from Vtiger CRM

The dashboard does not update automatically. Data refreshes only when an Admin runs a manual sync.

How to run a sync

5. Go to Admin → Sync in the sidebar.
6. Select the quarter to sync (Q1, Q2, Q3, or Q4).
7. Click Sync Now. Do not close the browser tab while syncing.
8. When complete, a confirmation shows the number of deals imported and the sync timestamp.

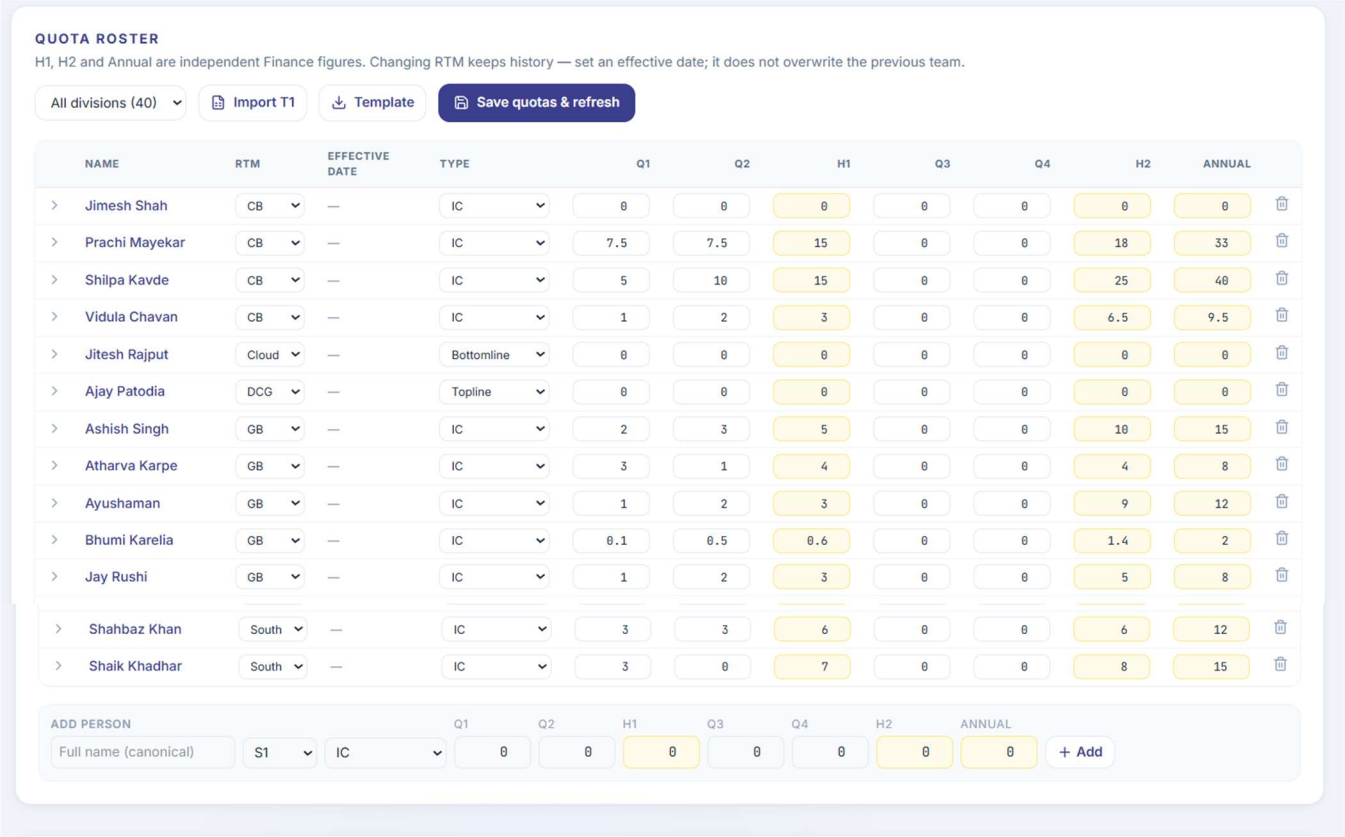

Cause	What to do
Name mismatch	Rep's Vtiger name does not match the alias table. Ask Admin to add the alias.
No Closed Won deals	Rep has pipeline but nothing at "Closed Won" stage yet.
Wrong period selected	Try switching to H1 or Annual to widen the window.
Sync not run	A new deal closed after the last sync. Ask Admin to run a sync.

What the sync does

- Pulls all Closed Won opportunities from Vtiger for the selected quarter.
- Maps Opportunity Led By to a canonical rep name using the alias table.
- Reads Amount, Estimated Bottomline, Category, Brand, and Organisation Name per deal.
- Updates all views: Overview, RTM, BUs, Accounts, Brands, Leaders, Employees, Leaderboard.

> ⚠ A failed sync does not corrupt existing data. The previous sync remains active. Contact the development team if errors persist.

4.2 Editing the IC Quota Roster

The IC Quota Roster is the only place quota figures exist in the platform — they do not come from Vtiger.

Editing a rep's quota

9. Go to Admin → Quotas.
10. Find the rep by name or use the division filter.
11. Click the cell to edit (Q1, Q2, H2, BL Quota etc.) and enter the value in ₹ Crore.
12. Click Save. H1 and Annual figures auto-recalculate from Q1+Q2 and H1+H2.

> ⚠ Saving overwrites the existing quota immediately. There is no undo. Verify the correct figure before saving.

Adding or removing a rep

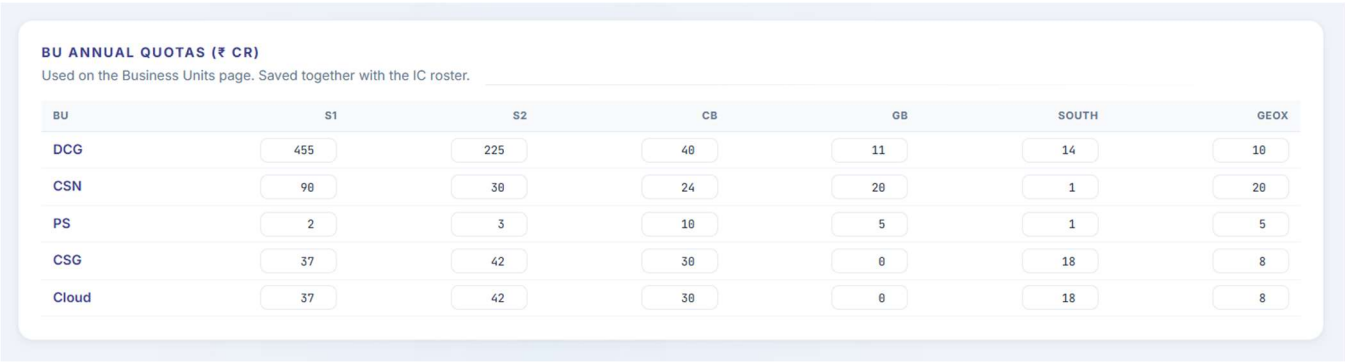

Action	Steps
Add a rep	Admin → Quotas → Add Rep. Fill canonical name, division, role, quota type, and quota figures. Then add their Vtiger name to Admin → Aliases.
Remove a rep	Set status to Inactive in Admin → Quotas. Do not delete — historical deals are preserved. Deleted reps appear as "Unnamed Rep" in past views.

4.3 Managing Name Aliases

Every spelling of a rep's name that appears in Vtiger must map to their canonical name in the alias table.

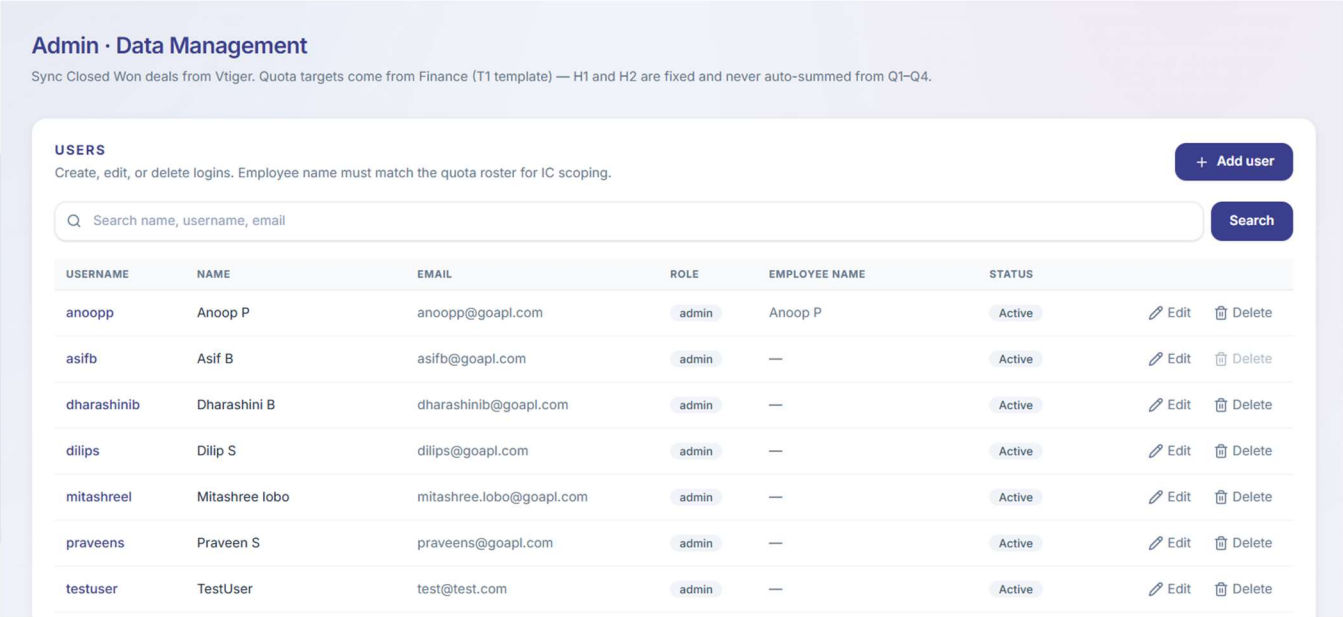

13. Go to Admin → Aliases.
14. Enter the exact Vtiger name string and select the canonical rep name it maps to.
15. After adding, run a sync to confirm the rep's actuals now appear correctly.

4.4 Editing BU Annual Quotas

16. Go to Admin → BU Quotas.
17. Enter Annual Quota (₹ Cr) and GP% target for each BU: DCG, CSN, PS, CSG, Cloud.
18. Save — BU cards reflect the new targets immediately. No sync required.

4.5 Managing User Accounts

Admin can create, edit, and manage user accounts — including setting usernames, passwords, and roles — directly from the Admin panel.

Adding a new user

1. Go to Admin → User Management.
2. Click Add User.
3. Enter the user's name and email address (this becomes their username).
4. Set a temporary password. The user should change this on first login.
5. Assign a role — User (IC), Leadership, or Admin.
6. Click Save. The user can now log in with the credentials provided.

Editing an existing user

1. Go to Admin → User Management.
2. Find the user by name or email.
3. Click Edit on their row.
4. Update the username, password, or role as needed.
5. Click Save. Changes take effect immediately.

Roles — what each one means

Role	Access level
User (IC / rep)	Can see only their own data on the Employees page
Leadership	Read-only access to all pages and all data
Admin	Full access — data, sync, quotas, aliases, and user management

> ⚠ If you change a user's role from Admin to User, they will lose access to the Admin menu immediately. Make sure this is intentional before saving.

---

5. Guide for Individual Contributors

5.1 How Your Actuals Are Calculated

> **Your actuals = sum of Amount on all Closed Won opportunities in Vtiger where you are the Opportunity Led By.**

- **Only Closed Won deals count** — deals at other stages are not included.
- **You must be the Opportunity Led By**, not just Assigned To. Assigned-To deals count as Contributed only.
- **Your Vtiger name must match your alias** — if a spelling differs, contact Admin.
- **Bottomline quota exception:** if your quota is on Bottomline (GP), your actuals use the Actual Bottomline field from Vtiger, not Amount.

5.2 Led-By vs Contributed Deals

	Led-By vs Contributed
What it means	Led-By: you are Opportunity Led By. Contributed: you are in Assigned To, but NOT Led By.
Counts in attainment?	Led-By: Yes — full amount. Contributed: No — shown in Contributed column only.
Where visible?	Led-By: your IC row, division total, Overview. Contributed: Contributed column on your Employees card.

5.3 Your Quota Structure

- **H1 Quota** = Q1 + Q2 quota (April–September).
- **H2 Quota** = Q3 + Q4 quota (October–March). Appears as "Estimated" until Admin sets H2 figures.
- **Annual Quota** = H1 + H2. Your full-year target.
- Quota is set by Admin from your individual Target Letter. Contact Admin if it looks wrong.

5.4 Why Your Numbers May Differ from Vtiger

Reason	Explanation
Last sync before your deal	Dashboard updates only when Admin runs a sync. Deals closed after the last sync won't appear yet.
Deal not at Closed Won	Only Closed Won deals count. Update the stage in Vtiger.

Name mismatch	Your Vtiger spelling doesn't match the alias. Ask Admin to check Admin → Aliases.
Contributed, not Led By	Only Led By deals count towards attainment. Contributed deals appear separately.
Vtiger = Billing; dashboard = Booking	Dashboard tracks deal Amount at close (Booking), not billing milestones.

---

6. Frequently Asked Questions

6.1 Data and Numbers

Q: Why are there three different revenue totals on the Overview page?

A: Each total measures something different. IC Actuals = RTM ICs only. Including Others = IC Actuals plus BU Heads and AVPs. BU Donut = all deals by category. See Section 2.1 for a full explanation.

Q: My deal closed in Vtiger but it's not showing on the dashboard.

A: Four possible causes: (1) The sync hasn't run since you closed the deal — ask Admin. (2) Your deal is not at "Closed Won" stage. (3) Your Vtiger name doesn't match the alias list — contact Admin. (4) The deal falls in a quarter that hasn't been synced yet.

Q: Why does my PS deal show a higher quota credit than its invoice value?

A: PS primary focus area deals carry a 2× multiplier. A ₹1 Cr managed services deal counts as ₹2 Cr towards quota credit. The dashboard shows actual revenue on the actuals tiles. See Section 2.4.

Q: What does "Estimated" mean on Q3 and Q4?

A: Q3 and Q4 data has not been synced from Vtiger yet. Figures shown are zero or projections. Do not use Estimated figures for formal performance reviews.

Q: Why is BU attainment different from RTM attainment for the same period?

A: RTM counts IC deals only. BU counts every deal in that category — including those led by BU Heads and support staff. A large deal led by a BU Head appears in BU actuals but not RTM actuals.

6.2 My Numbers (for ICs)

Q: Why do I only see my own data?

A: You have a User (IC) role, scoped to your own performance data. Contact Admin if you need broader access — role changes require management approval.

Q: A deal I contributed to isn't in my attainment total.

A: Correct — contributed deals (Assigned To, not Led By) appear in your Contributed column only. Only Led By deals count towards attainment.

Q: My H2 quota shows "–" or zero.

A: H2 quotas are set at the start of the second half. If it's still blank, contact Admin.

6.3 Sync and Data Freshness

Q: How often is the dashboard updated?

A: Only when Admin manually runs a Vtiger sync. There is no automatic sync. The last sync timestamp is shown on the Overview page.

Q: Can I trigger a sync myself?

A: No — only Admin role users can run a sync. If an urgent update is needed, ask your Admin.

Q: The sync ran but my numbers haven't changed.

A: No new Closed Won deals were found in Vtiger for that quarter since the last sync. Check deal stages in Vtiger.

6.4 Quota and Targets

Q: I need to update my quota. Who do I contact?

A: Contact your Admin. Changes take effect immediately after saving — no sync required.

Q: The quota shown for me is wrong.

A: Contact Admin. Verify against your Target Letter first — the dashboard quota comes directly from there.

Q: My annual quota differs from H1 + H2 added together.

A: The annual quota may have been entered as an explicit override. Contact Admin to verify.

6.5 Access and Roles

Q: I can't see the Admin menu.

A: You do not have the Admin role. Contact Admin if you need this access — role changes require management approval.

Q: I cannot log in.

A: Try the Forgot Password link on the login screen. If that fails, contact Admin to reset your account.

6.6 Names and Rep Mapping

Q: A rep's actuals show zero even though they have closed deals.

A: Almost always a name alias issue. The rep's Vtiger name doesn't match the alias table. Go to Admin → Aliases and add it.

Q: A new rep joined. What needs to happen before their deals appear?

A: Admin must: (1) Add them to Admin → Quotas with division, role, and quota figures. (2) Add their Vtiger name to Admin → Aliases. Then run a sync.

Q: A rep left the company. What happens to their deals?

A: Set them to Inactive in Admin → Quotas. Do not delete — historical deals are preserved for past periods.

---

7. Quick Reference

7.1 Key Contacts

Need	Contact
Quota change / correction	Admin team — direct message or email
Name alias / rep not appearing	Admin team — provide Vtiger name + canonical name + division
Urgent sync request	Admin team — state which quarter to sync
Bug or technical issue	Development team — share screenshot and steps to reproduce
Login / access problem	Admin team first, then development team
Business question about a number	Your BU Head or AVP

7.2 Glossary

Term	Definition
Actuals	Sum of Amount on all Closed Won deals for a rep or group in a given period.
Attainment %	Actuals ÷ Quota × 100. The primary performance metric.
Booking	A Closed Won deal — revenue that has been contracted. The dashboard tracks Bookings only.
Bottomline (BL)	Gross Profit — the margin on a deal. Sourced from Estimated BL and Actual BL fields in Vtiger.
Canonical name	The standardised rep name used on the dashboard. All Vtiger name variants map to this.
Closed Won	Vtiger opportunity stage = deal contracted and booked. Only these deals appear on the dashboard.
Contributed deal	A rep is in Assigned To but not Opportunity Led By. Not counted in attainment.
GeoX	Geo Expansion division. Reps may carry a Bottomline quota — attainment uses GP, not revenue.
H1 / H2	First half (April–September) and second half (October–March).
IC	Individual Contributor — a rep carrying a personal quota.

Led By	Opportunity Led By — the rep credited with the deal. Determines actuals attribution.
Multiplier	Quota credit factor applied to specific deal types: PS 2×, CSN 1.3×, DCG Storage 1.2×.
RTM	Route to Market — the sales divisions: S1, S2, CB, GB, South, GeoX.
Sync	Admin-triggered process that pulls Closed Won data from Vtiger into the dashboard.
TL	Team Lead — a senior IC who also carries a team quota.
Topline	Revenue — the full invoice Amount. Contrast with Bottomline (GP).
